Look Closely:

Look Closely Laura Caldwell, 2009-05-01 **To Look Closely** Laurie Rubin, 2023-10-10 Whether it's a trickling stream, a grassy slope, or an abandoned rail line, the natural world offers teachers a wonderful resource around which to center creative inquiry-based learning throughout the year. Nobody knows this better than veteran teacher Laurie Rubin. In *To Look Closely: Science and Literacy in the Natural World*, she demonstrates how nature study can help students become careful, intentional observers of all they see, growing into stronger readers, writers, mathematicians, and scientists in the process. Laurie invites you to join her class of twenty-one second graders as they visit a small stream in the woods behind a suburban elementary school, and she shares her reflections on class discussions, activities, and learning experiences. From setting a tone of inquiry-based thinking in the classroom to suggesting specific units of study for reading, writing, and science, Laurie guides teachers step by step through the basics of how to integrate the skills acquired through nature study into every subject. You will also discover all the ways this purposeful work nurtures green citizens who grow up determined to value and protect the natural environment. Filled with student journal entries, narratives, and poems inspired by experiences in the natural world, *To Look Closely* will inspire and encourage you to become a careful observer of your own spots outdoors and embrace nature study for a year or for whatever part of a year is possible for you. This book will change the way you view the world.

Looking Closely through the Forest Frank Serafini, 2014-03-01 Look closely. Look very closely. Is it flakes of oatmeal? A moldy orange? Give up. Just turn the page and lo and behold, it's a spotted toadstool. See what looks like gummy candy revealed as a millipede, a woolly scarf as frost on leaves, and many more surprises when you look closely through the forest. The *Looking Closely* series takes children on a journey of discovery through four environments: the forest, the shore, the desert, and the garden. Frank Serafini's camera lens enlarges each world through the magic of close-up photography. Young eyes will rediscover our planet as a place of beauty, mystery, and delight. Readers are first challenged to guess the identity of each closeup photograph. The next page reveals the entire photograph of the plant, animal, or natural object, accompanied by a simple but detailed description of the habitat. By inspiring children to ask questions and use their imaginations, these books help build problem-solving skills. They also encourage curiosity about environments that, examined this closely, are full of unexpected wonders.
