John Pickrell embarks on a world tour of new finds meeting the fossil hunters who work at the frontier of discovery. He reveals the dwarf dinosaurs unearthed by an eccentric Transylvanian baron, an aquatic crocodile snouted carnivore bigger than T rex that once lurked in North African waterways, a Chinese dinosaur with wings like a bat and a Patagonian sauropod so enormous it weighed more than two commercial jet airliners. Other surprising discoveries hail from Alaska, Siberia, Canada, Burma and South Africa. Why did dinosaurs grow so huge? How did they spread across the world? Did they all have feathers? What do sauropods have in common with 1950s vacuum cleaners? The stuff of adventure movies and scientific revolutions. *Weird Dinosaurs* examines the latest breakthroughs and new technologies that are radically transforming our understanding of the distant past. This history of the discovery of some of the most outlandish creatures that ever lived and the excitement of paleontological research will be sure to both entertain and instruct. Spencer Lucas, author of *Dinosaurs: The Textbook*, Sixth Edition. Fascinating. Readers learn of beautiful opalised dinosaur bones from Australia and a crested dinosaur found approximately 13 000 feet up Antarctica's Mt Kirkpatrick, demonstrating that dinosaurs were widely distributed across the globe. Publishers Weekly. [Palaeontology in Public](#) Chris Manias, 2025-01-21. Since the establishment of concepts of deep time in the late eighteenth and early nineteenth centuries, palaeontology has been one of the most high profile sciences. Dinosaurs, mammoths, human ancestors and other lost creatures from Earth's history are some of the most prominent icons of science and are essential for our understanding of nature and time. Palaeontology and its practitioners have had a huge impact on public understandings of science despite their often precarious and unsteady position within scientific institutions and networks. *Palaeontology in Public* considers the connections between palaeontology and public culture across the past two centuries. In so doing, it explores how these public dimensions have been crucial to the development of palaeontology and indeed how they conditioned wider views of science, nature, the environment, time and the world. The book provides a history of vertebrate palaeontology through a series of compelling case studies. Dinosaurs feature, of course, including *Spinosaurus*, Winsor McCay's *Gertie the Dinosaur* and the creatures of *Jurassic Park* and *The Lost World*. But there are also the small mammals of the Mesozoic, South American Glyptodonts and human ancestors like Neanderthals and Australopithecines. This book shows how palaeontology is defined by its relationship with public audiences and how this connection is central to our vision of the past and future of the Earth and its inhabitants. Praise for *Palaeontology in Public*. Surely there is a one way traffic from science to the media. In this remarkable collection of papers, Chris Manias and the authors explore palaeontological themes from the origin of life to interpretations of human culture through dinosaurs, of course, and many other fossil taxa. Michael J Benton, OBE, FRS, FRSE, University of Bristol. Palaeontology is a strange science at times arcane yet so accessible that many children dream of hunting for dinosaurs among sun-beaten badlands. *Palaeontology in Public* digs into the overlap of these two realms and offers a much needed exploration of how prehistoric beings emerge from stone and enter our collective imagination. Riley Black, author of *Last Days of the Dinosaurs* and *When the Earth Was Green*. In this

sweeping multi authored compilation reviews consider how ancient animals have been presented to the public for good or for ill From Lucy the australopithecine to Gertie the dinosaur and Jurassic Park never before has so much scholarly content on palaeontology s popularisation been amassed in a single volume Darren Naish vertebrate palaeontologist and author *101 Fun Facts About Dinosaurs: A Set of Seven 15-Minute Books* Caitlind L.
