Provost, 2006-06 At the beginning of World War II Germany and America were in a race to develop the atomic bomb The clear prize was European domination For reasons of security at the end of 1942 the Americans moved their nuclear weapons research and development program to a barren rocky New Mexico plateau called Los Alamos Suddenly Adolf Hitler realized he was going to come in second place in a race that had no second place With the Fuhrer's back against an atomic wall in desperation he sent his top spy to New Mexico His mission To steal America's atomic bomb secrets This is the story of Gunter Fleiss **Publications of Los Alamos Research** Los Alamos National Laboratory, 1989 The Nuclear Muse John Canaday, 2000 Canaday a poet and playwright who has been a Watson Fellow and a Starbuck Fellow in Poetry at Boston University analyzes a variety of texts produced by physicists before during and after WWII including Niels Bohr s The Quantum Postulate the technical lectures used for training at Los Alamos scientist's descriptions of their work and of the Trinity test and Leo Szilard's postwar novella The Voice of the Dolphins He looks at physicists use of figurative language in the development of quantum theory and examines the role played by the rhetorics of exploration and religion in the construction of the Los Alamos community Includes bandw historical photos Annotation copyrighted by Book News Inc Portland OR Alvarez: Adventures of a Physicist Luis W. Mariner, G. Kurt Piehler, 2009 Drawing on the latest research on the atomic bomb and its history the contributors to this provocative collection of eighteen essays set out to answer two key questions First how did the atomic bomb a product of unprecedented technological innovation rapid industrial scale manufacturing and unparalleled military deployment shape U S foreign policy the communities of workers who produced it and society as a whole And second how has American society s perception that the bomb is a means of military deterrence in the Cold War era evolve under the influence of mass media scientists public intellectuals and even the entertainment industry. In answering these questions The Atomic Bomb and American Society sheds light on the collaboration of science and the military in creating the bomb the role of women working at Los Alamos the transformation of nuclear physicists into public intellectuals as the reality of the bomb came into widespread consciousness the revolutionary change in military strategy following the invention of the bomb
