Lost Decade:

Zimbabwes Lost Decade Lloyd Sachikonye, 2012-04-24 Zimbabwe occupies a special place in African politics and international relations and has been the subject of intense debates over the years. At independence in 1980 the country was better endowed than most in Africa and seemed poised for economic development and political pluralism. The population was relatively well educated, the industrial and agricultural bases were strong, and levels of infrastructure were impressive. However, in less than two decades Zimbabwe was mired in a deep political and economic crisis. Towards the end of its third decade of independence, the economy had collapsed and the country had been transformed into a repressive state. How can we make sense of this decline? How can we explain the lost decade that followed? Can the explanation be reduced to the authoritarian leadership of Robert Mugabe and the role of ZANU PF? Or was something defective about the institutions through which the state has exercised its authority? Or was it the result of imperialism, the West, and sanctions? *Zimbabwes Lost Decade* draws on Lloyd Sachikonyes analyses of political developments over the past 25 years. It offers a critique of leadership systems of governance and economic strategies and argues for democratic values and practices and more broad-based participation in the development process.

What America Lost: Decades That Made a Difference Sallie Ferrell Bolich, 2009-08-04 As the fifties ended, we were about to embark on a journey that would take our American society in a completely new direction. By reviewing history, we can identify how the tumultuous sixties chose our path while each decade beginning in 1950 and continuing through 2000 determined our course at that time. On this journey, many values and lifestyles experienced by the Baby Boomers were left behind, not passed on to their children, Gen X and Gen Y. The resulting new outlook profoundly influenced attitudes held by these emerging generations. The fascinating field of handwriting analysis serves as our GPS, which enables us to identify these attitudes, trace where we've been, and understand where society is today. Handwriting is an expression of self and attitudes resulting from personal experiences, social interactions, and events that made a significant impact. Reliving the journey with insight is made possible by studying handwriting samples obtained from high school yearbooks covering those five decades. Numerous historical and societal changes profoundly influenced attitudes of today. These attitudes mirror our culture. Handwriting analysis will not reveal precise societal changes; however, it will reveal how these changes impact attitudes.

The Global Women's Movement Peggy Antrobus, 2004 Of all the great social movements of the twentieth century, it is the women's movement that looks set to continue to shape the course of social progress over the next generation. This overview of the international women's movement by the well-known feminist activist Peggy Antrobus asks: where are women now, particularly in the Third World, in the struggle against gender inequality? What are the issues, from poverty to sexual and reproductive health to the environment, that they face in different parts of the world? What challenges confront the women's movement, and what strategies are needed? Rooted in the author's long experience in seeing these movements in a changing national and global context over the past decades, this intervention will prove an

invaluable aid to reflection and action for the next generation of women as they carry through the unfinished business of women's emancipation

Lost Decades in Growth Performance Y. Chu, 2015-04-20 There have been many noticeable incidents of lost decades in economic growth occurring in countries across the world It has been found that in many economies the lost decade phenomenon persists even after the conventional set of contributing factors such as per capita income fertility rate life expectancy rule of law educational attainment ratio of investment to national income and openness have been taken into account This book explains where and how these lost decades in economic growth occur in the world The authors identify that dominant macroeconomic factors contributing to their occurrence are an abnormal supply of credits relative to national income and poor demand management The study pays special attention to the cases of Japan South Korea and Taiwan exploring their specific cases and analyzing contributing factors While Japan suffered from excessive credit prior to the bubble bursting and from insufficient domestic demand subsequently Korea's growth has been stunted through structural imbalances between and within industries as well as through changes in the orientation of public policies from growth to equality Adversely reduced economic growth in
