Nation Builders:

The Indian Nation Builders, 1988 *Nation Builders and Enemy Aliens* Gerhard P. Bassler, 2021-11-09 Today German Canadians are among Canada's most assimilated citizens often distinguishable from other Canadians by their name only For centuries their pioneer farmers economic developers industrialists professionals musicians artists missionaries fisherman boat builders and soldiers have acquired an acknowledged reputation as nation builders in Canada Not too long ago however they were also associated with Canada's enemy in two world wars discriminated against and subjected to infringements of their citizenship rights Virtually overnight Canadians of German speaking background were recast into disloyal enemy aliens Anti German sentiments and stigmas unknown in Canada before World War I became firmly entrenched and have obliterated their legacy as nation builders This book documents and illustrates how German Canadians have experienced Canada and how Canada has experienced German Canadians over the course of four centuries It shows what influence Canada's relations with Germany had on this development This is the first comprehensive synopsis of the German experience in Canada **The Indian Nation Builders** Low Price Publications, 1988 **Nation-Building** Jochen Hippler, 2005-06-20 The term nation building has experienced a remarkable renaissance since the early 1990s It has been used to describe and to justify the military interventions in Somalia Afghanistan and Iraq Linked to the idea of failed or failing states the concept is used to hide and legitimise a whole range of diverse policies allowing foreign powers to control and reshape countries in areas of conflict Currently the international debate on nation building is heavily dominated by US actors and authors especially by writers connected to the Bush administration or its policies This book presents academic and political alternatives presenting a critical view from Old Europe The book combines academic research and analysis with policy orientation with contributors from both fields It clarifies the terminology distinguishing developmental peace related imperial and analytical approaches to nation building Highlighting its connections to globalization democracy ethnic and religious minorities the contributors consider case studies such as Somalia the Balkans Afghanistan Iraq and Nigeria *Historians as Nation Builders* Dennis Deletant, Harry Hanak, 1988-06-18 A selection of papers from a conference held in honour of Professor Hugh Seton Watson on the occasion of his retirement in 1983 The aim of the contributors is to illustrate the role of the historian in the political life of Central and East European nations **Nation Building** Andreas Wimmer, 2020-04-28 A new and comprehensive look at the reasons behind successful or failed nation building Nation Building presents bold new answers to an age old question Why is national integration achieved in some diverse countries while others are destabilized by political inequality between ethnic groups contentious politics or even separatism and ethnic war Traversing centuries and continents from early nineteenth century Europe and Asia to Africa from the turn of the twenty first century to today Andreas Wimmer delves into the slow moving forces that encourage political alliances to stretch across ethnic divides and build national unity Using datasets that cover the entire world and three pairs of case studies Wimmer's theory of nation building focuses on slow moving

generational processes the spread of civil society organizations linguistic assimilation and the states capacity to provide public goods Wimmer contrasts Switzerland and Belgium to demonstrate how the early development of voluntary organizations enhanced nation building he examines Botswana and Somalia to illustrate how providing public goods can bring diverse political constituencies together and he shows that the differences between China and Russia indicate how a shared linguistic space may help build political alliances across ethnic boundaries Wimmer then reveals based on the statistical analysis of large scale datasets that these mechanisms are at work around the world and explain nation building better than competing arguments such as democratic governance or colonial legacies He also shows that when political alliances crosscut ethnic divides and when most ethnic communities are represented at the highest levels of government the general populace will identify with the nation and its symbols further deepening national political integration Offering a long term historical perspective and global outlook *Nation Building* sheds important new light on the challenges of political integration in diverse countries

Nation-Building Cynthia A. Watson, 2004-06-29 A revealing exploration of nation building around the world and its related problems and challenges from conflict to the role of democracy *Nation Building A Reference Handbook* offers an in depth examination of the nation building process with special focus on the late 20th century to the present U S national security expert Cynthia Watson explores economic political and social aspects of nation building and provides unique insight into hot issues and fundamental concerns Presenting nation building from many perspectives Watson discusses states such as Iraq Afghanistan the Balkan countries and East Timor among others She illustrates the challenges of rebuilding a country s infrastructure as well as unanticipated problems The work provides a thorough treatment of the role that democracy plays in the nation building process and illuminates the position of the United States juxtaposed with UN peacekeeping efforts This one of a kind reference work is complete with primary source documents biographical sketches and resource suggestions

Nation-building Gungwu Wang, 2005 Addressing questions such as how should historians treat the earlier pasts of each country and the nationalism that guided the nation building tasks this book tries to put them not only in the perspective of Southeast Asian developments of the past five decades but also the larger areas of historiography

Nation-Building Francis Fukuyama, 2006-02-15 Bestselling author Francis Fukuyama brings together esteemed academics political analysts and practitioners to reflect on the U S experience with nation building from its historical underpinnings to its modern day consequences The United States has sought on repeated occasions to reconstruct states damaged by conflict from Reconstruction in the South after the Civil War to Japan and Germany after World War II to the ongoing rebuilding of Iraq Despite this rich experience there has been remarkably little systematic effort to learn lessons on how outside powers can assist in the building of strong and self sufficient states in post conflict situations The contributors dissect mistakes false starts and lessons learned from the cases of Afghanistan and Iraq within the broader context of reconstruction efforts in other parts of the world including Latin America Japan and the Balkans Examining the contrasting

models in Afghanistan and Iraq they highlight the Coalition Provisional Authority in Iraq as a cautionary example of inadequate planning The need for post conflict reconstruction will not cease with the end of the Afghanistan and Iraq missions This timely volume offers the critical reflection and evaluation necessary to avoid repeating costly mistakes in the future Contributors Larry Diamond Hoover Institution and Stanford University James Dobbins RAND David Ekbladh American University Mich le A Flournoy Center for Strategic and International Studies Francis Fukuyama Paul H Nitze School of Advanced International Studies Johns Hopkins University Larry P Goodson U S Army War College Johanna Mendelson Forman UN Foundation Minxin Pei Samia Amin and Seth Garz Carnegie Endowment for International Peace S Frederick Starr Central Asia Caucasus Institute at Johns Hopkins School of Advanced International Studies F X Sutton Ford Foundation Emeritus Marvin G Weinbaum University of Illinois at Urbana Champaign **American Nation-Building** Kevin Dougherty,Robert J. Pauly, Jr.,2017-09-20 Nation building efforts by the United States and the international community have led to both success and failure overwhelming support and debilitating controversy Some are motivated by national security interests others by humanitarian concerns They seem to have exploded since the end of the Cold War but in fact have long been used as a foreign policy tool What they all have in common is a substantial investment of troops treasure and time There is no formula each operation is unique with lessons to be learned and trends noted Examining the history of America s experience this book describes the mechanisms behind what often appears to be a haphazard enterprise
