Sound, Image, and National Imaginary in the Construction of Latin/o American Identities Héctor Fernández L'Hoeste, Pablo Vila, 2017-12-26 Sound Image and National Imaginary in the Construction of Latin o American Identities addresses a gap in the many narratives discussing the cultural histories of Latin American nations particularly in terms of the birth configuration and perpetuation of national identities It argues that these processes were not as gradual or constrained as traditionally conceived The actual circumstances dictating the adoption of particular technologies for the representation of national ideas shifted and varied according to many factors including local circumstances political singularities economic disparities and highly individualized cultural transitions This book proposes a model of chronology that is valid not only for nations that underwent strong processes of nationalism during the early or mid

twentieth century but also for those that experienced highly idiosyncratic cultural economic and political development into the early twenty first century Children's Books In Print 1998 Bowker Editorial Staff,R R Bowker Publishing,Bowker,1998
