The Tribune Almanac and Political Register for ... ,1891 *The Tribune Almanac and Political Register* Horace Greeley, John Fitch Cleveland, F. J. Ottarson, Alexander Jacob Schem, Edward McPherson, Henry Eckford Rhoades, 1901 *The Political Economy of American Industrialization, 1877-1900* Richard Franklin Bensel, 2000-11-06 In the late nineteenth century the United States underwent an extremely rapid industrial expansion that moved the nation into the front ranks of the world economy At the same time the nation maintained democratic institutions as the primary means of allocating political offices and power The combination of robust democratic institutions and rapid industrialization is rare and this book explains how development and democracy coexisted in the United States during industrialization Most literature focuses on either electoral politics or purely economic analyses of industrialization This book synthesizes politics and economics by stressing the Republican party's role as a developmental agent in national politics the primacy of the three great developmental policies the gold standard the protective tariff and the national market in state and local politics and the impact of uneven regional development on the construction of national political coalitions in Congress and presidential elections *The Gatekeepers* Kevin Lyles, 1997-10-28 There are more than 600 Federal district judges serving today and they decide some 230 000 civil cases each year About 90% of the decisions they reach are final Lyles argues that these lower court judges not only influence the flow of information to the judicial hierarchy but they formulate questions that influence how higher courts including the Supreme Court respond As such they are key elements in the formulation and implementation of public policy To cite a few examples they desegregate school districts run mental institutions and prisons break up monopolies and reapportion legislatures Lyles begins by examining the structure and function of federal courts and detailing the history operation and purpose of the district courts He then turns to the selection nomination and appointment of district judges Lyles then analyzes the extent to which presidents might advance policy objectives through their judicial appointments to the district courts After examining how African American Latino and white judges male and female view their roles as policy actors Lyles concludes with a discussion of the implications of the study Important for students and scholars of contemporary public policy and the court system **Tribune Almanac and Political Register ...** ,1897

Roots of Reform Elizabeth Sanders, 1999-08 Offering a revision of the understanding of the rise of the American regulatory state in the late 19th century this book argues that politically mobilised farmers were the driving force behind most of the legislation that increased national control The Tribune Almanac and Political Register for ,1909 **The Cost of Racial Equality** Major G. Coleman, 2025-10-14 Knowing the cost of products is important If you don't know how much your item costs whatever it may be you are likely to be overcharged or under protected Racial equality is very much like any product Generally you get what you pay for assuming you are buying well made products from reputable and professional sources The more you pay the more you get the less you pay the less you get But everyone knows there are often wild

exceptions to the general rule of getting what you pay for Racial equality is no exception Some low cost racial equality programs provide tremendous bang for the buck K 12 school integration affirmative action in higher education funding for anti discrimination enforcement and political equality in voting are just a few examples However by refusing to calculate the costs involved and choosing to pay little or nothing for racial equality the nation is defaulting to the highest cost options This is like trying to save money on transportation by not changing the oil in your car Racial equality cost decisions are particularly problematic as the nation moves to being majority minority by mid century Not knowing the costs for racial equality threatens American democracy

The Nature of Rights at the American Founding and Beyond Barry Alan Shain, 2007 Americans have been claiming and defending rights since long before the nation achieved independence But few Americans recognize how profoundly the nature of rights has changed over the past three hundred years In *The Nature of Rights at the American Founding and Beyond* Barry Alan Shain gathers together essays by some of the leading scholars in American constitutional law and history to examine the nature of rights claims in eighteenth century America and how they differed if at all from today's understandings Was America at its founding predominantly individualistic or in some important way communal Similarly which understanding of rights was of greater centrality the historical rights of Englishmen or abstract natural rights And who enjoyed these rights however understood Everyone Or only economically privileged and militarily responsible male heads of households The contributors also consider how such concepts of rights have continued to shape and reshape the American experience of political liberty to this day Beginning with the arresting transformation in the grounding of rights prompted by the American War of Independence the volume moves through what the contributors describe as the Founders Bill of Rights to the second Bill of Rights that coincided with the Civil War and ends with the language of rights erupting from the horrors of the Second World War and its aftermath in the Cold War By asking what kind of nation the founding generation left us or intended to leave us the contributors are then able to compare that nation to the nation we have become Most if not all of the essays demonstrate that the nature of rights in America has been anything but constant and that the rights defended in the late eighteenth century stand at some distance from those celebrated today Contributors Akhil Reed Amar Yale University James H Hutson Library of Congress Stephen Macedo Princeton University Richard Primus University of Michigan Jack N Rakove Stanford University John Phillip Reid New York University Daniel T Rodgers Princeton University A Gregg Roeber Pennsylvania State University Barry Alan Shain Colgate University Rogers M Smith University of Pennsylvania Leif Wenar University of Sheffield Gordon S Wood Brown University
