

THE NATIONAL QUESTION (continued from page 1)

The question that arises in connection with nationalism is not whether it is a good or bad thing, but whether it is a necessary and just thing. The answer to this question is not simple, for it depends on the circumstances. In some cases, nationalism is a necessary and just response to a real threat to a nation's survival. In other cases, it is a selfish and unjust attempt to impose one's will on others. The question of nationalism is a complex one, and it is one that must be answered on a case-by-case basis.

Strandmann, Robert John Weston
Evans**

National Question In Europe In Historical Context:

The National Question in Europe in Historical Context Mikuláš Teich, Roy Porter, 1993-05-06 The historical impact of national movements in Europe has been dramatic and continues to be an issue of major importance Leading historians authoritatively discuss European nationalism in its historical context

The Encyclopedia of Christianity Erwin Fahlbusch, Geoffrey William Bromiley, 1999 The Encyclopedia of Christianity is the first of a five volume English translation of the third revised edition of Evangelisches Kirchenlexikon Its German articles have been tailored to suit an English readership and articles of special interest to English readers have been added The encyclopedia describes Christianity through its 2000 year history within a global context taking into account other religions and philosophies A special feature is the statistical information dispersed throughout the articles on the continents and over 170 countries Social and cultural coverage is given to such issues as racism genocide and armaments while historical content shows the development of biblical and apostolic traditions This comprehensive work while scholarly is intended for a wide audience and will set the standard for reference works on Christianity Outstanding reference sources 2000 American Libraries May 2000 Comp by the Reference Sources Committee RUSA ALA

Nature and Society in Historical Context Mikulas Teich, Roy Porter, Bo Gustafsson, 1997-02-13 A collection of essays describing the historical connection between nature and society

Economic Change and the National Question in Twentieth-Century Europe Alice Teichova, Herbert Matis, Jaroslav Pátek, 2000-11-30 The authors in this collection of essays address the largely neglected but significant economic aspects of the national question in its historical context during the course of the twentieth century There exists a large gap in our understanding of the historical relationship between the national question and economic change Above all there is insufficient knowledge about the economic dimension of the historical experience with regard to the former multi national states such as the Soviet Union Yugoslavia or Czechoslovakia and equally too little is known about the economic component of national tensions and conflicts in bilingual Belgium or Finland or the multilingual Spain or Switzerland At the same time as emphasis is placed on the complex relationships between the economy and society in individual European countries questions of state identity language religion and racism as instruments of economic furtherance are at the centre of the contributors attention

Nationalism and Revolution in Europe, 1763-1848 Dean Kostantaras, 2025-10-01 Nationalism and Revolution in Europe 1763 1848 addresses enduring historiographical problems concerning the appearance of the first national movements in Europe and their role in the crises associated with the Age of Revolution Considerable detail is supplied to the picture of Enlightenment era intellectual and cultural pursuits in which the nation was featured as both an object of theoretical interest and site of practice In doing so the work provides a major corrective to depictions of the period characteristic of earlier ventures including those by authors as notable as Hobsbawm Gellner and Anderson while offering an advance in narrative coherence by portraying how developments in the sphere of ideas influenced the terms of political debate in France and elsewhere in

the years preceding the upheavals of 1789 1815 Subsequent chapters explore the composite nature of the revolutions which followed and the challenges of determining the relative capacity of the three chief sources of contemporary unrest constitutional national and social to inspire extra legal challenges to the Restoration status quo **The Revolutions in Europe, 1848-1849** Hartmut Pogge von Strandmann, Robert John Weston Evans, 2000 These essays arose out of lectures given in Oxford to commemorate the 150th anniversary of the 1848 revolutions in Europe Authoritative yet readable and colourful they comprise judicious summaries of the existing state of knowledge as well as new insights and unfamiliar information The book also seeks to place the revolutionary events in their wider context apart from chapters covering the main centres of disturbance in France Germany Italy and the Habsburg lands there are discussions of the situation in Britain and Russia which were affected but not convulsed by the disorders elsewhere of reactions in the United States of America of the symbolism of 1848 for the later democratic radical and socialist movements 1848 marked the first breakdown of traditional authority across much of the continent and as such is of profound significance in the development of modern European politics as a whole **The Victorian World** Martin Hewitt, 2013-01-25 With an interdisciplinary approach that encompasses political history the history of ideas cultural history and art history The Victorian World offers a sweeping survey of the world in the nineteenth century This volume offers a fresh evaluation of Britain and its global presence in the years from the 1830s to the 1900s It brings together scholars from history literary studies art history historical geography historical sociology criminology economics and the history of law to explore more than 40 themes central to an understanding of the nature of Victorian society and culture both in Britain and in the rest of the world Organised around six core themes the world order economy and society politics knowledge and belief and culture The Victorian World offers thematic essays that consider the interplay of domestic and global dynamics in the formation of Victorian orthodoxies A further section on Varieties of Victorianism offers considerations of the production and reproduction of external versions of Victorian culture in India Africa the United States the settler colonies and Latin America These thematic essays are supplemented by a substantial introductory essay which offers a challenging alternative to traditional interpretations of the chronology and periodisation of the Victorian years Lavishly illustrated vivid and accessible this volume is invaluable reading for all students and scholars of the nineteenth century Liberal and Illiberal Nationalisms R. Taras, 2002-07-05 How people construct their idea of home influences the types of nationalisms that emerge in various parts of the world These nationalisms can be inclusive or exclusionary tolerant or intolerant peaceful or violent In this important new book Ray Taras provides a comprehensive analysis of the history and study of nationalism He describes what happens when home is defined as empire Russia and India secessionist state KwaZulu and Quebec uninational Volkstaat Germany and Israel or transnational community Islam and anti Americanism Finally he explores the idea that the mantra of multiculturalism has fuelled conflicts over what home is and generates divisions within and between communities *Banal Nationalism* Michael Billig, 1995-09-25

Michael Billig presents a major challenge to orthodox conceptions of nationalism in this elegantly written book. While traditional theorizing has tended to focus on extreme expressions of nationalism, the author turns his attention to the everyday, less visible forms which he describes as banal nationalism. The author asks why people do not forget their national identity. He suggests that in daily life nationalism is constantly flagged in the media through routine symbols and habits of language. Banal Nationalism is critical of orthodox theories in sociology, politics, and social psychology for ignoring this core feature of national identity. Michael Billig argues forcefully that with Contemporary Nationalism in East Central Europe Paul Latawski, 2016-07-27. This book provides an introductory survey to contemporary nationalism in East Central Europe. It examines the problem of nationalism in the region in the wake of the collapse of communism and attempts to place recent events within a historical context. The book contains selected essays devoted to specific countries as well as those covering nationalism on a regional basis. A further reading list is included to encourage a deeper probing into the problem of nationalism in East Central Europe.

As recognized, adventure as skillfully as experience just about lesson, amusement, as without difficulty as accord can be gotten by just checking out a ebook **National Question In Europe In Historical Context** as a consequence it is not directly done, you could take even more around this life, in the region of the world.

We provide you this proper as competently as simple mannerism to acquire those all. We pay for National Question In Europe In Historical Context and numerous book collections from fictions to scientific research in any way. among them is this National Question In Europe In Historical Context that can be your partner.
