Preliminary Assessment of the Proposed Closure of the National Technical Information Service (NTIS) United States. National Commission on Libraries and Information Science, 2000 **Hazardous Waste Sites** Michael R. Greenberg, Richard F. Anderson, 1984-11-01 Mutual distrust defines the relationship between those who are the sources of hazardous wastes and those who oversee their activities A lack of credibility argue the authors is a formidable if not the biggest obstacle to properly managing hazardous waste in the United States Nowhere is the credibility gap wider than where there are hazardous waste management facilities or where sites have been proposed The purpose of this book is to provide comprehensive perspectives on hazardous waste sites in the United States The sources of hazardous waste are described along with the scientific and legal climates that allowed wastes to be discarded with little attention to impacts Evidence is weighed for and against public health as well as environmental economic and social damages at abandoned sites Political processes and analytical techniques are suggested and illustrated for those who are involved in the siting of new facilities A strategy for hazardous waste management is offered together with approaches to substantially reduce the difficulties faced by local planners and site managers who face a hostile public A historical legacy of mismanagement fueled by exaggeration of impacts and by a lack of information characterizes hazardous waste management in the United States This book will be important to planners environmental scientists and public health officials In order to assure accessibility for the casual reader the authors keep the explanation of mathematical methods and technologies in this area to a minimum **Helping America compete : the role of federal scientific & technical information.** ,1990 The United States must make better use of its scientific and technical information STI resources if it wishes to be competitive in world markets and maintain its leadership STI is an essential ingredient of the innovation process from education and research to product development and manufacturing It is a major product of the 65 billion per year the U S Government spends on research and development R researchers need ready access to STI if they are to stay at the cutting edge Many issues of our time health energy transportation and climate change require STI to understand the nature and complexities of the problem and to identify and assess possible solutions STI is important not only to scientists and engineers but to political business and other leaders who must make decisions related to science and technology and to the citizens who must live with the consequences of these decisions **Federal Scientific and Technical Information in an Electronic Age** United States.
