

NATIONAL DECONSTRUCTION

VIOLENCE, IDENTITY, AND JUSTICE IN BOSNIA

DAVID CAMPBELL

National Deconstruction

Stephanie Lawson

National Deconstruction:

National Deconstruction David Campbell, How did Bosnia once a polity of intersecting and overlapping identities come to be understood as an intractable ethnic problem David Campbell pursues this question and its implications for the politics of community democracy justice and multiculturalism through readings of media and academic representations of the conflict in Bosnia National Deconstruction is a rethinking of the meaning of ethnic nationalist violence and a critique of the impoverished discourse of identity politics that crippled the international response to the Bosnian crisis Rather than assuming the preexistence of an entity called Bosnia Campbell considers the complex array of historical statistical cartographic and other practices through which the definitions of Bosnia have come to be These practices traverse a continuum of political spaces from the bodies of individuals and the corporate body of the former Yugoslavia to the international bodies of the world community Among the book's many original disclosures arrived at through a critical reading of international diplomacy is the shared identity politics of the peacemakers and paramilitaries Equally significant is Campbell's conclusion that the international response to the Bosnian war was hamstrung by the poverty of Western thought on the politics of heterogeneous communities Indeed he contends that Europe and the United States intervened in Bosnia not to save the ideal of multiculturalism abroad but rather to shore up the nationalist imaginary so as to contain the ideal of multiculturalism at home By bringing to the fore the concern with ethics politics and responsibility contained in more traditional accounts of the Bosnian war this book is a major statement on the inherently ethical and political assumptions of deconstructive thought and the reworkings of the politics of community it enables *Ethics and Politics after*

Poststructuralism Madeleine Fagan, 2013-09-16 What would political thought look like without the foundation of ethics Drawing on the work of Emmanuel Levinas Jacques Derrida and Jean Luc Nancy Madeleine Fagan puts forward a radical and far reaching refusal of foundational ethics Instead she proposes an account of the inseparability of ethics and politics The ethical should not be understood as a label it does not mean good or right it is not an evaluation or guide Rather both the ethical and the political are descriptions of the context in which we find ourselves The book highlights the necessity of a practice based rethinking of the relationship between ethics and politics and so denaturalises a series of commonplaces about poststructuralist ethics

The Concept of Truth in International Relations Theory Matthew Fluck, 2017-04-12 This book charts the role played by conceptions of truth in the development of a critical tradition of International Relations theory Providing a detailed account of the conceptions which have shaped the work of Critical Theorists and Poststructuralists the book reaffirms the importance of epistemic reflection for the discipline It argues that the partially abstract character of the main strands of critical IR arises not from their concern with epistemic matters but from their insistence that truth is purely intersubjective Drawing on the philosophy of Theodor Adorno the book argues that IR's critical tradition can be rejuvenated by combining its original politicisation of truth with a critical account of its objectivity The book will be a valuable resource

for scholars and graduate students interested in the future of critical International Relations theory *Security as Practice*
 Lene Hansen, 2013-04-03 This important text offers a full and detailed account of how to use discourse analysis to study foreign policy It provides a poststructuralist theory of the relationship between identity and foreign policy and an in depth discussion of the methodology of discourse analysis Part I offers a detailed discussion of the concept of identity the intertextual relationship between official foreign policy discourse and oppositional and media discourses and of the importance of genres for authors ability to establish themselves as having authority and knowledge Lene Hansen devotes particular attention to methodology and provides explicit directions for how to build discourse analytical research designs Part II applies discourse analytical theory and methodology in a detailed analysis of the Western debate on the Bosnian war This analysis includes a historical genealogy of the Western construction of the Balkans as well as readings of the official British and American policies the debate in the House of Commons and the US Senate Western media representations academic debates and travel writing and autobiography Providing an introduction to discourse analysis and critical perspectives on international relations this book will be essential reading for students and scholars of international relations discourse analysis and research methodology *United States Foreign Policy and National Identity in the 21st Century*
 Kenneth Christie, 2009 Examines the complex relationship between United States foreign policy and American national identity as it has changed from the post cold war period through the defining moment of 9 11 and into the 21st century Starting with a discussion of notions of American identity in an historical sense the contributors go on to examine the most central issues in US foreign policy and their impact on national identity including the end of the Cold War the rise of neo conservatism ideas of US Empire and the influence of the War on Terror The book sheds significant new light on the continuities and discontinuities in the relationship of US identity to foreign policy *The Global Politics of Contemporary Travel Writing*
 Debbie Lisle, 2006-11-02 To what extent do best selling travel books such as those by Paul Theroux Bill Bryson Bruce Chatwin and Michael Palin tell us as much about world politics as newspaper articles policy documents and press releases Debbie Lisle argues that the formulations of genre identity geopolitics and history at work in contemporary travel writing are increasingly at odds with a cosmopolitan and multicultural world in which everybody travels Despite the forces of globalization common stereotypes about foreignness continue to shape the experience of modern travel The Global Politics of Contemporary Travel Writing is concerned with the way contemporary travelogues engage with and try to resolve familiar struggles about global politics such as the protection of human rights the promotion of democracy the management of equality within multiculturalism and the reduction of inequality This is a thoroughly interdisciplinary book that draws from international relations literary theory political theory geography anthropology and history **Reexamining the National-Philological Legacy**
 Vladimir Biti, 2014-01-02 Has thinking working and teaching in terms of national literatures become obsolete in today s globalized world of hyphenated languages literatures and cultures Since the rise of modern

European national philologies coincided with the emergence of modern European nation states does the dissolution of the latter in the European supranational unity imply the suspension of the former Or we must on the contrary consider the fact that today's Europe is not only postnational but in its re-nationalized East Central European part post-multinational as well i.e. emerging out of the breakdown of the postimperial state formations such as the Soviet Union Czechoslovakia and Yugoslavia

Identities, Nations and Politics after Communism Roger E. Kanet, 2013-10-18 This book focuses on questions of identity that have confronted the countries of Central and Eastern Europe after the collapse of the communist system that had previously provided them with an identity This development both facilitated and necessitated a reassessment of the now independent nations' history orientation symbols and identity In some cases new states were created without a clear national identity while in others the nation was regaining statehood but not always within borders that had an historical association with the nation concerned The multiethnic character of the space of the former Soviet Union and its erstwhile satellites and the long historical legacy of complex relations boundary changes population migration and economic and social changes presented different challenges to the various nations and states concerned The essays in this volume attempt to elucidate and understand the issues of ethnic and national identity and their relationship to the emerging statehood in various regions of the post-communist world This study makes clear that some nation states were far better prepared to handle these issues than others and that the longer term impact of the communist experience has varied This book was previously published as a special issue of Nationalities Papers

The Subject of Coexistence Louiza Odysseos, Odysseos traces the institutional neglect of coexistence to the ontological commitments of international relations as a modern social science predicated on conceptions of modern subjectivity

Bosnia Remade Gerard Toal, Carl T. Dahlman, 2011-02-16 Bosnia Remade is an authoritative account of ethnic cleansing and its partial undoing from the onset of the 1990s Bosnian wars up through the present Gerard Toal and Carl Dahlman combine a bird's-eye view of the entire war from onset to aftermath with a micro-level account of three towns that underwent ethnic cleansing and later the return of refugees There have been two major attempts to remake the ethnic geography of Bosnia since 1991 In the first instance ascendant ethno-nationalist forces tried to eradicate the mixed ethnic geographies of Bosnia's towns villages and communities These forces devastated tens of thousands of homes and lives but they failed to destroy Bosnia Herzegovina as a polity In the second attempt which followed the war the international community in league with Bosnian officials endeavored to reverse the demographic and other consequences of this ethnic cleansing While progress has been uneven this latter effort has transformed the ethnic demography of Bosnia and moved the nation beyond its recent segregationist past By showing how ethnic cleansing was challenged Bosnia Remade offers more than just a comprehensive narrative of Europe's worst political crisis of the past two decades It also offers lessons for addressing an enduring global problem

Critical Terrorism Studies Jacob Stump, Priya Dixit, 2013-05-02 This book is an introduction to critical approaches to terrorism studies While there is a growing body of

Critical Terrorism Studies CTS literature devoted to empirical examples and conceptual development very little has been written about how to systematically carry out this kind of research Critical Terrorism Studies fills this gap by addressing three key themes The position of terrorism studies and critical terrorism studies in the discipline of International Relations IR Theoretical and methodological elaborations of critical approaches to the study of terrorism Empirical illustrations of those approaches Drawing upon a range of engaging material the volume reviews a series of non variable based methodological approaches It then goes on to provide empirical examples that illustrate how these approaches have been and can be utilized by students teachers and postgraduate researchers alike to critically and rigorously study terrorism This textbook will be of much interest to students of terrorism studies sociology critical security studies and IR in general 'Balkanization' and the Euro-Atlantic Processes of the (Western) Balkans Liridona Veliu Ashiku,2024-08-30 This book explores how balkanization as a discourse underpins the policies of the European Union EU and the North Atlantic Treaty Organization NATO toward the Western Balkans It shows how EU and NATO policies have emerged from and led to the constant reinvention of the unity of the West through balkanizing the region and illustrates how this dynamic is maintained by and instrumentalized for the political elites Through a genealogical analysis that stretches from the Balkans Wars to more recent events such as North Macedonia s change of name in 2018 the author shows how Western policies have aimed at recreating the united West on the back of the broken Balkans The book will appeal to scholars and students of Southeast Europe International Relations Political Science Peace and Conflict Studies and History *Archives, Ancestors, Practices* Nathan Schlanger,Jarl Nordbladh,2008-06-01 In line with the resurgence of interest in the history of archaeology manifested over the past decade this volume aims to highlight state of the art research across several topics and areas and to stimulate new approaches and studies in the field With their shared historiographical commitment the authors leading scholars and emerging researchers draw from a wide range of case studies to address major themes such as historical sources and methods questions of archaeological practices and the practical aspects of knowledge production visualizing archaeology and the multiple roles of iconography and imagery and questions of identity at local national and international levels **Religion and Conflict in South and Southeast Asia** Linell E. Cady,Sheldon W. Simon,2006-09-27 A major new contribution to comparative and multidisciplinary scholarship on the alignment of religion and violence in the contemporary world with a special focus on South and Southeast Asia Religion and Conflict in South and Southeast Asia shows how this region is the site of recent and emerging democracies a high degree of religious pluralism the largest Muslim populations in the world and several well organized terrorist groups making understanding of the dynamics of religious conflict and violence particularly urgent By bringing scholars from religious studies political science sociology anthropology and international relations into conversation with each other this volume brings much needed attention to the role of religion in fostering violence in the region and addresses strategies for its containment or resolution The dearth of other literature on the intersection of religion politics

and violence in contemporary South and Southeast Asia makes the timing of this book particularly relevant This book will of great interest to advanced undergraduate and postgraduate students of Asian politics security studies and conflict studies

The New Agenda for International Relations Stephanie Lawson,2013-07-08 There have been significant political eras which have shaped not only the structure of world politics but the way in which it has been studied The geopolitical and ideological contours of the Cold War period for example had an impact on almost every aspect of world politics and the study of international relations for around 45 years This book argues that just as the collapse of the Soviet Union in the period following the fall of the Berlin Wall signalled the end of strategic polarization it also marked the apparent end of a particular form of polarized debate around political social and economic ideas The various new directions taken by scholars of international relations in the post Cold War era constitute a large part of a new agenda for the discipline This collection reflects the variety of issues and approaches that have become part and parcel of this agenda over the past ten years Issues tackled in this volume include the power of culture and ideology the concept of globalisation inequality human rights and security as well as reflections on new forms of polarization in the post Cold War world Each contributor addresses the nature of changes and continuities in world politics considers how the discipline of international relations itself has changed and reflects on possible directions for the twenty first Century This book will be of great interest to scholars of international relations global politics economics and related disciplines

History's Fools David Martin Jones,2020-03-09 A tale of Western liberal hubris and our failure to escape from history

From Kosovo to Darfur Sidita Kushi,2025-07-07 Why are some violent crises more likely to prompt humanitarian military interventions than others Conventional wisdom says that humanitarian military interventions occur due to national interests shared values and norms or economic benefits for the interveners Yet neither of these factors can fully explain the selectivity of such interventions The international community continues to ignore the decades long suffering in Darfur often dismisses the genocidal policies within Myanmar and even perpetuates the suffering in contemporary Yemen while undertaking humanitarian laden missions in Libya Syria and the Balkans Using in depth case studies and new data on all post Cold War internal armed conflicts matched to third party responses *From Kosovo to Darfur* offers the first regionally sensitive analysis of humanitarian military intervention since the end of the Cold War It shows that international military interventions in the context of acute humanitarian crises are driven by different pathways within the Western versus the non Western world and fueled by elite perceptions of the crisis making interventions closer to the geographic and cultural West most probable and most intense As our international community becomes increasingly interdependent and aware of human suffering across borders *From Kosovo to Darfur* points to new pathways of conflict trajectories and reveals vital implications for leaders scholars and nongovernmental actors advocating for or against international military intervention as a policy choice

The New Twenty Years' Crisis Philip

Cunliffe,2020-09-01 The liberal order is decaying Will it survive and if not what will replace it On the eightieth anniversary of

the publication of E H Carr s *The Twenty Years Crisis* 1919 1939 Philip Cunliffe revisits this classic text juxtaposing its claims with contemporary debates on the rise and fall of the liberal international order *The New Twenty Years Crisis* reveals that the liberal international order experienced a twenty year cycle of decline from 1999 to 2019 In contrast to claims that the order has been undermined by authoritarian challengers Cunliffe argues that the primary drivers of the crisis are internal He shows that the heavily ideological international relations theory that has developed since the end of the Cold War is clouded by utopianism replacing analysis with aspiration and expressing the interests of power rather than explaining its functioning As a result a growing tendency to discount political alternatives has made us less able to adapt to political change In search of a solution this book argues that breaking through the current impasse will require not only dissolving the new forms of utopianism but also pushing past the fear that the twenty first century will repeat the mistakes of the twentieth Only then can we finally escape the twenty years crisis By reflecting on Carr s foundational work *The New Twenty Years Crisis* offers an opportunity to take stock of the current state of international order and international relations theory

Security after Christendom John Heathershaw, 2024-02-13 We live in the wealthiest and most heavily defended world in history so why do we feel so insecure In a secular world what does Christian theology have to say about this problem *Security after Christendom* combines practical examples social scientific research and an ecumenical approach to political theology to answer these questions It argues that Christendom was a plural phenomenon of imagined security communities of East and West whose unravelling continues to have implications for global politics today as dramatically illustrated by Russia s war in Ukraine While notions of a new Christendom are idolatrous and delusional secular imaginaries of national security or the liberal international order are both destructive and unstable True security radical inclusion nonviolent protection and abundant provision is an eschatological phenomenon inaugurated by Christ *Security after Christendom* is neither found in faithful government nor an exclusive church as polis approach but in relations of tension where the fallen powers are continuously confronted by prophetic practices A post Christendom community expresses its love for the world by seeking its security providentially limiting the disorders of the secular age and offering glimmers of a new earth
