Lea,1979 **Conservation of Marine Archaeological Objects** Colin Pearson,2014-05-20 Over the past twenty years there has been a significant increase in underwater activities such as scuba diving which coupled with the adventure andromance always associated with shipwrecks has led to rapid developments in the discovery and excavation of shipwrecked material These shipwrecks are invaluable archaeological time capsules which in themajoriety of cases have come to an equilibrium with their environment As soon as artefacts on the wreck site are moved this equilibrium is disturbed and the artefacts may commence to deteriorate sometimes in a rapid and devastating fashion In fact excavation without having conservation facilities available is vandalism the artefacts are much safer being left on the sea bed Such famous shipwrecks as the Mary Rose 1545 the Wasa 1628 and the Batabia 1629 have not only brought the world s attention to these unique finds but have also produced tremendous conservation problems The treatment of a 30 metre waterlogged wooden hull or large cast iron cannon is still causing headaches to conservators **Archaeology of Prehistoric Native America** Guy E.

Dye,2008 Patty Jo Watson s prolific career began in the early 1950s as an energetic graduate student at the University of Chicago and culminated with her induction into the National Academy of Sciences and subsequent retirement from Washington University in 2003 During that time her groundbreaking research impacted multiple fields within the discipline of archaeology but her astonishing research into the underground caves of the eastern United States recognizes her as one of the world s leading experts on cave archaeology In honor of Dr Watson and her monumental achievements in the field twenty

Grove,2004 This concise and accessible new text offers original and insightful analysis of the policy paradigm informing international statebuilding interventions The book covers the theoretical frameworks and practices of international statebuilding the debates they have triggered and the way that international statebuilding has developed in the post Cold War era Spanning a broad remit of policy practices from post conflict peacebuilding to sustainable development and EU enlargement Chandler draws out how these policies have been cohered around the problematization of autonomy or self government Rather than promoting democracy on the basis of the universal capacity of people for self rule international statebuilding assumes that people lack capacity to make their own judgements safely and therefore that democracy requires external intervention and the building of civil society and state institutional capacity Chandler argues that this policy framework inverts traditional liberal democratic understandings of autonomy and freedom privileging governance over government and that the dominance of this policy perspective is a cause of concern for those who live in states involved in statebuilding as much as for those who are subject to these new regulatory frameworks Encouraging readers to reflect upon the changing understanding of both state society relations and of the international sphere itself this work will be of great interest to all scholars of international relations international security and development
