

4. La classification dite *National Library of Medicine (NLM)*

La Bibliothèque nationale de médecine implantée à Bethesda, dans l'État du Maryland (États-Unis) est, comme son nom l'indique, spécialisée dans les sciences biomédicales. La NLM n'est pas seulement la plus grande bibliothèque médicale au monde ; véritable laboratoire, elle participe à des programmes de recherche et de développement, produit la précieuse base de données bibliographiques Medline et, plus en amont, est à l'origine de la classification dite *National Library of Medicine*.

La NLM, prévue originellement pour remplacer la partie médicale de la classification de la *Library of Congress* (classe « R »), suit le même système de notation, consistant en lettres majuscules (par exemple, « WG » pour « Appareil cardio-vasculaire ») suivies de chiffres. C'est donc un système alphanumérique comportant au maximum 5 éléments (par exemple, « WG200 » pour « Cœur »). Très simple d'accès, son architecture part toujours du domaine le plus général pour aller vers des domaines plus restreints et précis : le système ou l'appareil est d'abord étudié dans son ensemble, puis chaque organe l'est en particulier.
