National Literacy Campaigns Historical And Comparative Perspectives:

National Literacy Campaigns R.F. Arno, H.J. Graff, 1987-07-31 We came to the task of editing this book from different disciplines and backgrounds but with a mutuality of interest in exploring the concept of literacy campaigns in historical and comparative perspective. One of us is a professor of comparative education who has participated in and written about literacy campaigns in Third World countries notably Nicaragua; the other is a comparative social historian who has written on literacy campaigns in Western history. Both of us believed that literacy could only be understood in particular. As Harvey Graff has noted to consider any of the ways in historical contexts which literacy intersects with social, political, economic, cultural, or psychological life requires excursions into other records. Thus we have set out in this edited collection to explore some five hundred years of literacy campaigns in vastly different societies: Reformation Germany, early modern Sweden and Scotland, the nineteenth century United States, nineteenth and early twentieth century Russia and the Soviet Union, pre-Revolutionary and Revolutionary China, and a variety of Third World countries in the post World War II period: Tanzania, Cuba, Nicaragua, and India. In addition, we have included studies of the UNESCO sponsored Experimental World Literacy Program and recent adult literacy efforts in three industrialized Western countries: the United Kingdom, France, and the United States.

National Literacy Campaigns and Movements Jose Carlos Chiaramonte, 2017-09-08 Major campaigns to raise levels of literacy have taken place for centuries and share many common elements. But despite literacy campaigns spanning over five decades, 860 million adults still lack minimal ability to read, write, and calculate. Why is literacy of such great importance and why have so many years of campaigning for it not been successful in fully overcoming this obstacle? *National Literacy Campaigns and Movements* explores these questions by examining campaigns in vastly different societies from a historical

and comparative perspective The volume focuses on literacy movements from the past including those of Reformation Germany early modern Sweden and Scotland nineteenth century United States nineteenth and early twentieth century Russia and the Soviet Union pre Revolutionary and Revolutionary China and Tanzania Cuba Nicaragua and India Contributors analyze literacy goals and outcomes in specific contexts The editors distinguish quantitative and qualitative dimensions of literacy activities such as the difference between the spread of literacy and patterns of its use The common enterprise of this book is to expand upon the contributors previous research to include a comparative dimension This book offers the first systematic attempt to examine critically and comparatively the concepts and facts of large scale literacy campaigns in more than a dozen societies over nearly five hundred years It offers a valuable historical lesson not only for historians but also for educators that instead of concentrating only on the recent period we should use the vast and complex history of literacy movements to shed understanding on the present and future of literacy A major new introduction to this edition asserts recent literary campaigns and the lessons provided by their success and failures It also describes how the focus of some movements has evolved

Education and Social Change in Latin America Carlos Alberto Torres, 1995 Education and Social Change in Latin America is a valuable addition to the area studies literature in Comparative Education Torres knits contributions from

recognized North and South American experts to produce a comprehensive tapestry of analyses of both formal and non formal education in Latin America The book constitutes an excellent example of the application of a broad social science perspective to the study of education viewed as a constituent sub system The foci of non formal education Part I political socialisation Part II and the impact of social change upon education in Brazil Part III facilitates a broad range of comparisons A balance between the often contradictory perspectives economic anthropological sociological and political provides the reader with a comprehensive snapshot of trends and developments in Latin American education during the crucial 1980s This inter disciplinary examination of aspects of Latin American education has a broad range of applications ranging from introductory courses to senior seminars to a valuable research tool What would otherwise be an exceptional book is rendered even more valuable by Torres conversation with Paulo Freire While Torres is recognized as one of the foremost authorities on Freire this chapter explores Freire as a human being an educator and introduces some of the contradictions faced by a world renowned adult educator who assumed the mantle of an administrator in the formal education system in his native Brazil between 1989 and 1991 *The New Literacy* John Willinsky, 2017-11-28 Originally published in 1990 This book examines the innovative programs that changed the way reading and writing was taught during the previous ten years Both teacher and critic of the New Literacy programs the author gives a perspective that allows educators parents and other readers to assess the promise of these programs Examining the work of educators from the USA UK and Canada he compares programs from first grade to college that foster a new level of literate engagement and voice in students while creating a less authoritative place in which to learn The book opens up wider debate about literacy in a society concerned with shifting authority from text and teacher to student **Literacy Myths, Legacies, and Lessons** Harvey J. Graff, 2017-07-05 In his latest writings on the history of literacy and its importance for present understanding and future rethinking historian Harvey J Graff continues his critical revisions of many commonly held ideas about literacy The book speaks to central concerns about the place of literacy in modern and late modern culture and society and its complicated historical foundations Drawing on other aspects of his research Graff places the chapters that follow in the context of current thinking and major concerns about literacy and the development of both historical and interdisciplinary studies Special emphasis falls upon the usefulness of the literacy myth as an important subject for interdisciplinary study and understanding Critical stock taking of the field includes reflections on Graff s own research and writings of the last three decades and the relationships that connect interdisciplinary rethinking and the literacy myth The collection is noteworthy for its attention to Graff s reflections on his identification of the literacy myth and in developing LiteracyStudies OSU Ohio State University as a model for university wide interdisciplinary programs It also deals with ordinary concerns about literacy or illiteracy that are shared by academics and concerned citizens These nontechnical essays will speak to both academic and nonacademic audiences across disciplines and cultural orientations *The Labyrinths Of Literacy* Harvey Graff, 2020-02-10 A compelling collection by one of the

pioneers of revisionist approaches to the history of literacy in North America and Europe The Labyrinths of Literacy offers original and controversial views on the relation of literacy to society leading the way for scholars and citizens who are willing to question the importance and function of literacy in the development of society today **World Mental Health Casebook** Alex Cohen, Arthur Kleinman, Benedetto Saraceno, 2002-04-30 In 1974 the World Health Organization began research on the effectiveness of mental health services in the developing world Through their efforts they found that treatment methods were extremely limited in their usefulness and in some cases even inappropriate and harmful Little has changed in the last quarter century but the research in these countries has shown that psychological need often stems from poor physical conditions Elements including social and economical inequalities gender discrimination political violence and malnutrition and poor physical health all contribute to the social and psychological decay of both individuals and communities Currently the goal of the WHO is to document previous studies on communities of developing countries and to build on this information in order to move forward in research Using real cases based in the South Pacific Asia South and Latin America and Europe this volume sets out examples of community based interventions that have succeeded by implementing outreach to the families and community to identify those in need reliable and adequate drug supplies treatment interventions healthy psychosocial environments This book will interest mental health professionals international public health workers global program administrators and clinicians and healthcare workers all working with low income areas
