Romania Stephen Roper, 2004-08-02 The Romanian revolution was motivated by a desire for greater political and intellectual freedom and economic prosperity It was the bloodiest of the eastern European transitions due to Ceausescu's cult of personality However many of the goals of the revolution are still unfulfilled The lack of civil society charges of political corruption the failure to transform the economy and concerns over the protection of ethnic minority rights are all factors in Romania's failure to become a fully integrated European country Tracing the country's political history and examining Romania's postcommunist politics economic transition and foreign policy this book contemplates the prospects for this country as it enters the twenty first century

The Liberal Project and the Transformation of Democracy Sabrina P. Ramet, 2007 Drawing on a classical understanding of liberalism based on a philosophy of Natural Law she probes the issues of capitalism national sovereignty and self determination gender inequality and political legitimacy in the context of Eastern Europe's particular experience

The Remote Borderland Laszlo Kurti, 2001-07-19 The Remote Borderland explores the significance of the contested region of Transylvania to the creation of Hungarian national identity Author Laszlo Kurti illustrates the process by which European intellectuals politicians and artists locate their nation's territory embody it with meaning and reassert its importance at various historical junctures The book's discussion of the contested and negotiated nature of nationality in its East Central European setting reveals cultural assumptions profoundly mortgaged to twentieth century notions of home nation state and people The Remote Borderland shows that it is not only important to recognize that nations are imagined but to note how and where they are imagined in order to truly understand the transformation of European societies during the twentieth century

Women in the Age of Economic Transformation Nahid Aslanbeigui, Steven Pressman, Gale Summerfield, 1994 The editors conclude that this is unlikely to be random rather it reflects the social and political condition of women Addressing these issues is thus essential if the burden of economic transformation is to be distributed fairly

The Economic Sources of Social Order Development in Post-socialist Eastern Europe Richard Connolly, 2013 Nearly twenty years after the collapse of socialism the countries of post socialist Eastern Europe have experienced divergent trajectories of political development This book looks at why this is the case based on the assumption that societies or social orders can be distinguished by the extent to which competitive tendencies contained within them economic political social and cultural are resolved according to open rule based processes The book explores which economic conditions allow for increased levels of political competition and it tests the hypothesis that the nature of a country's ties with the international economy and the level of competition within a country's economic system will shape the trajectory of political competition

within that society The book goes on to argue that after several decades of relative bloc autarky during the socialist period the ongoing process of reintegration with the international economy across the post socialist region has resulted in distinct patterns of structural economic development and that that these patterns are of crucial importance in explaining the variation in social order type across the post socialist region By offering a more precise analysis of the causal mechanisms that link economic and political competition the book makes a useful contribution to research on the different patterns of political behaviour that have been observed across the post socialist region since the collapse of the socialist regimes
