**Nationalism and Education Since 1789** Edward Hartman Reisner,1922      **Nationalism and Education** Edward H. Reisner,2015-07-07 Excerpt from Nationalism and Education Since 1789 a Social and Political History of Modern Education In the large view education is public policy related inseparably to economic conditions social organization and political administration The educator who would wisely plan the activities and the management of the schools must pay attention to the major conditions of life outside the schools and must be able to evaluate educational procedure in terms of far reaching and broadly inclusive social purpose No less must the statesman who would build a just efficient prosperous and patriotic nation enlist the schools in his efforts and utilize them to effect his aims Up to the outbreak of the World War the pre eminent importance of education as a phase of public policy had not been so clearly recognized in the United States as in some other great nations of the world We had believed in the schools and had been generous in supporting them but as a nation we had not concerned ourselves very actively with educational policies The war has considerably changed this attitude and we suddenly find citizens and legislatures making all kinds of demands upon the school system Since many of the proposals that are being made among us have been exemplified in the school systems of other nations it might be well for us before undertaking any radical reorganization of the spirit and method of American public education to find out what has resulted from the application of similar policies in other countries Furthermore a study of the administrative systems which those other nations have built up will aid in guiding our heightened desire for greater educational efficiency About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

**World Yearbook of Education 2005** David Coulby,Evie Zambeta,2005-01-14 This volume deals with two major and apparently opposing forces within education and society globalization and nationalism Globalization is often considered in economic terms of continued growth of international trade and a concentration of wealth in corporate hands yet it also encompasses technological political and cultural change The World Yearbook of Education 2005 explores the role of the education sector in our globalized knowledge economy and considers the political implications of this in terms of monopolarity and the cultural consequences of homogenization and Americanization The other strand of this study nationalism remains a persistent force within education and society in all parts of the world and this volume examines the extent to which it can fuel conflict at all levels through prejudice and intolerance Concentrating on the epistemological consequences of nationalism leading international thinkers examine the extent to which it is reflected in the curricula of

schools and universities around the world Finally the complex relationship between globalization and nationalism is explored and contributors explore the part that educational institutions and practices play in forming both agendas A wide range of perspectives are employed including post colonial discourse classical economics and sociological theory Nationalism and globalization are both ongoing processes and this volume makes a case for the central role of education in both through its potential to influence change and to act as benevolent force in shaping a global community Nationalism and Education Since 1789 Edward Hartman Reisner,1923 **Nationalism and Education Since 1789** Edward H. *Nationalism in Education* Klaus Schleicher,1993 The comparative Reader with authors from 6 continents and 9 countries analyses to what extent the nation concept is still at the heart of international organizations and agreements under which circumstances nationalism rose in specific regions and cultures at different times and to what extent education was influenced by or used for nationalistic doctrines and policies Case studies as well as systematic analyses illustrate that education can hardly change its own socioeconomic and political context However education and educational policy can support a prevention of and balance to nationalism in the long run if they counteract stereotyping and scapegoating familiarize with overlapping and competing loyalties and encourage human rights international cooperation and cultural relationalism *Foundations of Education* J.
