Political Identity in South Asia David Taylor, Malcolm Yapp, 2024-02-29 First published in 1979 *Political Identity in South Asia* deals with the relationship between language religion and political identity Political identity is a broader concept than that of nationalism which it embraces and the contributors are concerned with a wide range of political phenomena in South Asia Primary attention is paid to linguistic and religious factors in the making of political identities and the formulation of new political demands but the operation of these factors is seen as being conditioned and in some cases determined by grander political and economic forces Within this framework three papers are particularly concerned with Muslims in South Asia and three with southern India where language has played an important part Two papers are studies of Bangladesh and Sri Lanka and one is concerned with tribal populations in India The volume is completed by two more general essays on the subject of political identity This book will be of interest to students of sociology history South Asian studies and ethnic studies

Constructing the EU's Political Identity Sabine Saurugger, Mark Thatcher, 2022-10-23 This book examines the construction of the EU's political identity or identities variations in its strength and the nature of its content Drawing on studies both on European nation state formation and on the EU's identity the chapters take a top down approach and analyse how EU institutions in different major policy domains have themselves sought to create political identity through policy making The authors define the construction of EU political identity and set out empirically applicable indicators to assess political identity in policy making They analyse the construction of identity through a process oriented approach that explicitly includes contestation and the existence of rival political identities Comparing across policy domains the contributions suggest that the ability of EU institutions to construct an EU political identity has been limited not only by existing national identities but also by the coexistence of rival EU political identities within policy domains Hence it has been difficult for EU institutions to establish a strong identity with identity being strongest where there are clear external alternatives and limited rival identities within the EU

Rethinking Political Identity Colin Crouch, 2025-03-12 In this precisely argued book Colin Crouch questions the current meaning of political parties for citizens in Western Europe given that the identities on which they are based were the product of past conflicts over industrialization and religion Crouch asks whether the issues confronting post and ex industrial societies can develop their own political identities among citizens And if so how far do these identities relate to the inheritance of the past

Hegel on Political Identity Lydia L. Moland, 2011-04-30 In *Hegel on Political Identity* Lydia Moland provocatively draws on Hegel's political philosophy to engage sometimes contentious contemporary issues such as patriotism national identity and cosmopolitanism Moland argues that patriotism for Hegel indicates an attitude toward the state whereas national identity is a response to culture The two combine Hegel claims to enable citizens to develop concrete freedom Moland argues that Hegel's account of political identity extends to his notorious theory of world history she also proposes that his resistance to cosmopolitanism be reassessed in response to our globalized world By focusing on Hegel's depiction of political identity as a central part of modern life Moland shows the potential of Hegel's philosophy to address issues that lie at the heart of ethical and political philosophy

shaping perceptions of self interest and determining political loyalty but also shows the ways in which allegiances could and did change for much of the Angolan population in response to the experience of military force Political Practices and International Order Stefan Heuser,Hans Günter Ulrich,2007 International order is one of the most challenging issues in political ethics today and its place within the multifaceted field of politics is frequently debated The diverse phenomena resulting from globalisation particularly in the wake of the end of the so called Cold War urge us to think about our world in terms of a single political entity Besides the existing international institutions however it is still open to question what this entity should be and what concrete political practices should correspond to it In the essays collected in this book political scientists sociologists philosophers theologians and policy advisors explore how political practices can be institutionally localised without necessarily becoming incorporated into structures of governance Political ethics as presented in this book seeks to address the particular practices of power justice and peace of citizens themselves and to assess their relevance for the shaping of international insti
