Studies in Colonial Nationalism Richard Jebb, 1905 FROST copy 2 From the John Holmes Library collection

Self-Determination and Collective Responsibility in the Secessionist Struggle Costas Laoutides, 2016-03-03 The often violent emergence of new independent states following the end of the Cold War generated discussion about the normative grounds of territorial separatism A number of opposing approaches surfaced debating whether and under which circumstances there is a right for a community to secede from its host country Overwhelmingly these studies placed

emphasis on the right to secession and neglected the moral stance of secessionist movements as agents in international relations. In this book Costas Laoutides explores the collective moral agency involved in secessionist struggles offering a theoretical model for the collective responsibility of secessionist groups. Case studies on the Kurds and the people of Moldova and Transdniestria illustrate the author's theoretical arguments as he seeks to establish how although the principle of self-determination was envisaged as a means of gradually bestowing political power upon the people it never managed to realize its full potential because it was interpreted strictly within a framework of exclusionary politics of identity.
