Recovering a Lost River Steven Hawley, 2012-03-06 In the Pacific Northwest the Snake River and its wilderness tributaries were as recently as a half century ago some of the world's greatest salmon rivers Now due to four federal dams the salmon population has dropped close to extinction Steven Hawley journalist and self-proclaimed river rat argues that the best hope for the Snake River lies in dam removal a solution that pits the power companies and federal authorities against a collection of Indian tribes farmers fishermen and river recreationists The river's health as he demonstrates is closely connected to local economies freshwater rights and energy independence Challenging the notion of hydropower as a cheap green source of energy Hawley depicts the efforts being made on behalf of salmon by a growing army of river warriors Their message persistent but disarmingly simple is that all salmon need is water in their rivers and a clear way home

Ancient Places Jack Nisbet, 2015-05-19 From a master of regional and natural history comes a collection of essays that reveals how the Pacific Northwest shaped the people and how the people shaped the land Drawing on a range of personal research author Jack Nisbet engages some of the iconic images in Northwest history from fossil riches to ice age floods from the Willamette Meteorite to the 1872 Earthquake from up and down mining cycles to steady rounds of tribal food gathering Although the scale of time and space in some of the pieces is immense individual characters still manage to leave their marks even though the force of modern civilization sometimes seems overwhelming small places and their key components somehow persevere These are the genesis stories of a region In Ancient Places Jack Nisbet uncovers touchstones across the Pacific Northwest that reveal the symbiotic relationship of people and place in this corner of the world

Wildlife Stewardship on Tribal Lands Serra J. Hoagland, Steven Albert, 2023-05-23 Tribes have Jurisdiction over some of the healthiest wild areas in North America collectively managing over 56 million acres of land This is no accident in addition to a deep reverence for the land and a strong history of environmental stewardship Native peoples implement some of the best fish and wildlife preservation and management practices on the continent Wildlife Stewardship on Tribal Lands is the first comprehensive resource dedicated to the voices and expertise of Native scholars and wildlife professionals Nearly

one hundred Indigenous wildlife conservationists and managers as well as their collaborators provide the book's lessons on how best to incorporate Native methods and work effectively with tribal stakeholders. The authors cover topics that include guidelines for conducting research on tribal lands, traditional ecological knowledge-based management models, the cultural and ecological importance of key species, legal battles for treaty rights, management authority, and funding first foods and food sovereignty, fisheries, and migratory bird management, tribal perspectives on the Endangered Species Act, a history of modern fish and wildlife management on tribal lands. Alongside research findings, methodologies, and case studies, oral histories and spiritual knowledge are shared through interviews with tribal leaders and the work of Native artists and writers. *Wildlife Stewardship on Tribal Lands* reveals tribal practices as pivotal guideposts for those seeking to protect and honor the land, harness our natural resources in ways that can help reverse grievous biodiversity losses, and ensure the health of our environment for future generations.

The Collector Jack Nisbet, 2011-03 Jack Nisbet first told the story of British explorer David Thompson who mapped the Columbia River in his acclaimed book *Sources of the River* which set the standard for research and narrative biography for the region. Now Nisbet turns his attention to David Douglas, the premier botanical explorer in the Pacific Northwest and throughout other areas.

Plowed Under Andrew P. Duffin, 2009-11-17 In *Plowed Under* Andrew P. Duffin traces the transformation of the Palouse region of Washington and Idaho from land thought unusable and unproductive to a wealth-generating agricultural paradise, weighing the consequences of what this progress has wrought. During the twentieth century, the Palouse became synonymous with wheat, and the landscape was irrevocably altered. At the dawn of the twenty-first century, native vegetation is almost nonexistent, stream water is so dirty that it is often unfit for even livestock, and 94 percent of all land has been converted to agriculture. Commercial agriculture also created a less noticeable ecological change: soil erosion. While common to industrial agriculture nationwide, topsoil loss evoked different political and social reactions in the Palouse. Farmers all over the nation take pride in their freedom and independence, but in the Palouse, Duffin shows, this mentality, a remnant of an older agrarian past, has been taken to the extreme and is partly responsible for erosion problems that are among the worst in the nation. In the hope of charting a better, more sustainable future, Duffin argues for a candid look at the land, its people, their decisions, and the repercussions of those decisions. As he notes, the debate is not over whether to use the land, but over what that use will look like and its social and ecological results.
