Natos Empty Victory A Postmortem On The Balkan War:

NATO's Empty Victory Ted Galen Carpenter, 2000 The Clinton administration and the other NATO governments boast that the alliance won a great victory in its war against Yugoslavia *The Media and Human Rights* Ekaterina Balabanova, 2014-09-25 In recent years there has been an explosion in the usage and visibility of the language of human rights but what does this mean for the role of the media For evolving ideas about human rights And for the prospect of shared cosmopolitan values Ekaterina Balabanova argues that in order to answer these questions there needs to be a deconstruction of monolithic ways of thinking about the media and human rights incorporating the spectrum of political arguments and worldviews that underpin both Ten case studies are presented which illustrate many of the problems and challenges associated with the relationship between the media and human rights The examples range from cases of humanitarian intervention to analysis of global human rights campaigning on refugee issues from immigration and asylum to genocide freedom of speech and torture Anchored in an appreciation of the political conflicts and compromises at the heart of international human rights agreements *The Media and Human Rights* is an invaluable resource for students studying media and human rights international politics security studies and political communication [A Legal Geography of Yugoslavia's Disintegration](#) Ana S. Trbovich, 2008-02-05 *A Legal Geography of Yugoslavia's Disintegration* explains the violent break up of the former Yugoslavia in early 1990s in the context of two legal principles sovereignty and the self determination of peoples The author recounts Yugoslavia's history with a focus on the country's internal administrative divisions and aspirations of different ethnic groups in order to effectively explain the genesis of the international community's political decision to recognize the right of secession for the largest administrative units of Yugoslavia Trbovich a Serbian author writing from the perspective of a disengaged scholar tackles her subject matter with clarity and detail and offers an intriguing analysis of Kosovo's future status international recognition of secession implications of Yugoslavia's disintegration for other conflicts invoking right to self determination and international intervention in ethnic conflicts **China's Future** Cato Institute, 2000 This book is the outgrowth of a September 1999 Cato Institute conference *Whither China The PRC at 50* ix Includes bibliographical references and index **Smokescreen** Paul F. J. Aranas, 2012 The United States and NATO regularly employ the illegitimate use of force using alternative norm justifications and a faulty definition of legitimacy Meanwhile the U S education system and mass media largely ignore the history and principles of the United Nations *Smokescreen* reinforces the need to respect the rule of law enshrined in the UN Charter and offers a path forward out of the haze of purported altruistic justifications Publisher description **Winning Ugly** Ivo H. Daalder, Michael E. O'Hanlon, 2004-05-13 After eleven weeks of bombing in the spring of 1999 the United States and NATO ultimately won the war in Kosovo Serbian troops were forced to withdraw enabling an international military and political presence to take charge in the region But was this war inevitable or was it the product of failed western diplomacy prior to the conflict And

once it became necessary to use force did NATO adopt a sound strategy to achieve its aims of stabilizing Kosovo In this first in depth study of the Kosovo crisis Ivo Daalder and Michael O Hanlon answer these and other questions about the causes conduct and consequences of the war Based on interviews with many of the key participants they conclude that notwithstanding important diplomatic mistakes before the conflict it would have been difficult to avoid the Kosovo war That being the case U S and NATO conduct of the war left much to be desired For more than four weeks the Serbs succeeded where NATO failed forcefully changing Kosovo s ethnic balance by forcing 1 5 million Albanians from their home and more than 800 000 from the country Had they chosen to massacre more of their victims NATO would have been powerless to stop them In the end NATO won the war by increasing the scope and intensity of bombing making serious plans for a ground invasion and moving diplomacy into full gear in order to convince Belgrade that this was a war Serbia would never win The Kosovo crisis is a cautionary tale for those who believe force can be used easily and in limited increments to stop genocide mass killing and the forceful expulsion of entire populations Daalder and O Hanlon conclude that the crisis holds important diplomatic and military lessons that must be learned so that others in the future might avoid the mistakes that were made in this case

Weapons of Mass Migration Kelly M. Greenhill, 2010-03-18 IR theorists foreign policy analysts and migration security studies and human rights scholars will all find this book a valuable addition to their scholarship Political Studies Review At first glance the U S decision to escalate the war in Vietnam in the mid 1960s China s position on North Korea s nuclear program in the late 1990s and early 2000s and the EU resolution to lift what remained of the arms embargo against Libya in the mid 2000s would appear to share little in common Yet each of these seemingly unconnected and far reaching foreign policy decisions resulted at least in part from the exercise of a unique kind of coercion one predicated on the intentional creation manipulation and exploitation of real or threatened mass population movements In *Weapons of Mass Migration* Kelly M Greenhill offers the first systematic examination of this widely deployed but largely unrecognized instrument of state influence She shows both how often this unorthodox brand of coercion has been attempted more than fifty times in the last half century and how successful it has been well over half the time She also tackles the questions of who employs this policy tool to what ends and how and why it ever works Coercers aim to affect target states behavior by exploiting the existence of competing political interests and groups Greenhill argues and by manipulating the costs or risks imposed on target state populations This coercion by punishment strategy can be effected in two ways the first relies on straightforward threats to overwhelm a target s capacity to accommodate a refugee or migrant influx the second on a kind of norms enhanced political blackmail that exploits the existence of legal and normative commitments to those fleeing violence persecution or privation The theory is further illustrated and tested in a variety of case studies from Europe East Asia and North America To help potential targets better respond to and protect themselves against this kind of unconventional predation *Weapons of Mass Migration* also offers practicable policy recommendations for scholars government officials and

anyone concerned about the true victims of this kind of coercion the displaced themselves *Cato Handbook for Congress* Cato Institute, Edward H. Crane, David Boaz, 2003 Offering policy recommendations supported by brief rationales this handbook offers the capitalist libertarian perspective on issues currently facing Congress Highlights include advice on campaign finance reform the USA PATRIOT Act the war on drugs monetary policy deregulation taxes education *Kosovo and International Society* Alex J. Bellamy, 2002-08-11 This book explains the international engagement with the Kosovo conflict from the dissolution of Yugoslavia to Operation Allied Force It shows how Kosovo was deliberately excluded from the search for peace in Yugoslavia before going on to demonstrate how a shaky international consensus was forged to support air strikes in 1999 In doing so it exposes many of the myths and conspiracy theories that have developed about the war and explains the dilemmas facing actors in this unfolding drama **Grand Strategy from Truman to Trump** Benjamin Miller, Ziv Rubinovitz, 2020-11-10 American foreign policy is the subject of extensive debate Many look to domestic factors as the driving forces of bad policies Benjamin Miller instead seeks to account for changes in US international strategy by developing a theory of grand strategy that captures the key security approaches available to US decision makers in times of war and peace Grand Strategy from Truman to Trump makes a crucial contribution to our understanding of competing grand strategies that accounts for objectives and means of security policy Miller puts forward a model that is widely applicable based on empirical evidence from post WWII to today and shows that external factors rather than internal concerns are the most determinative
