Natural Forms And Forces:

The Four Forces of Human Nature: A Unifying Theory Roberto Trevino Pena, 2024-06-13 Since physicists discovered the four fundamental forces of nature weak strong electromagnetic and gravity they have tried to unify them into one theory Physicists went down to the subatomic level to search and ended up with vibrating strings They went up into space and ended up with gravitons which are yet to be found But what do these forces mean in terms of human behavior In *The Four Forces of Human Nature A Unifying Theory* Dr Trevino Pena identifies the human forces and the specific areas of the brain responsible for processing them He demonstrates the analogy between physics and human forces and explains how the interaction of these influences human behavior The four forces are affective cognitive communicative and socio environmental The processing centers for each of these forces are respectively the amygdala thalamus cerebral cortex and insular cortex The aims of these are to get keep and increase the four necessities health status wealth and basic drives eat sleep sex Every person needs the four necessities for self preservation Without these humans can die prematurely or become extinct as a species Four groundbreaking and health advice are offered in this book Groundbreaking This is the first publication to bring together the feeling thinking talking and environmental sciences into one act to explain human behavior Groundbreaking The reader will be surprised to know that it is not the cerebral cortex that rules thinking it is the thalamus The thalamus is the driver and the cerebral cortex is the vehicle Health advice Examples are provided where the amygdala reacts to fantasy causing excessive secretion of stress chemicals that lead to chronic diseases Illnesses we self inflict by faulty feelings Health advice The thalamus is the best tool to mitigate these made up illnesses The problem is that people underutilize the cognitive force because it takes effort to put it into operation Lastly it is important to note that I have simplified the complexity of the human brain so as not to lose you the reader in the thick forest of brain circuitry **Forces**

of Nature Adrian Renner, Frederike Middelhoff, 2022-09-06 By the end of the 18th century notions of forces of nature Naturkr fte were increasingly discussed across disciplinary bounds attraction and repulsion vital forces and electric fluids formative drives and biological organisms were examined as forces linked to natural processes German Romantic literature science and philosophy from Schelling and Novalis to G nderrode and H ilderlin pondered interrelated notions of forces considered as dynamic and continually active in nature forces which in turn also appeared to shape human actions social structures and cultural developments This volume explores the points of reference for approaches to and afterlives of Romantic conceptions and representations of natural forces at the intersection of natural sciences and cultural imaginaries
