Photographic Atlas of Planets Briggs, Fredric Taylor, 1986-08-14. This richly illustrated book contains over 200 photographs, nearly half of which are in full colour. It constitutes the best collection of available photographs of the planets that have been obtained from space over the past two decades. Also included wherever available are global maps of the planets and their satellites. Each of the following chapters is devoted to one of the planets, summarizing what has been learned about that planet and explaining in non-technical terms the features that can be seen in the many breathtaking photographs that are presented. The chapters are set out with the text first, followed by the figures, each accompanied by a long caption describing its essential points.

The Picture World of Planets Norman S. Barrett, 1990-01-01. **Reading for the Planet** Christian Moraru, 2015-11-05. In his new book, Christian Moraru argues that post-Cold War culture in general, and in particular the literature, philosophy, and theory produced since 1991, foreground an emergent planetary imaginary, a planetarism binding in unprecedented ways the world's peoples, traditions, and aesthetic practices. This imaginary, Moraru further contends, speaks to a world condition, planetarity, increasingly exhibited by human expression worldwide. Grappling with the symptoms of planetarity in the arts and the human sciences, the author insists is a major challenge for today's scholars: a challenge. Reading for the Planet means to address this. Thus, Moraru takes decisive steps toward a critical methodology, a geomethodology for dealing with planetarism's aesthetic and philosophical projections. Here, Moraru analyzes novels by Joseph O'Neill, Mircea Cartarescu, Sorj Chalandon, Zadie Smith, Orhan Pamuk, and Dai Sijie, among others, as demonstration of his paradigm.

Amazing World Stars & Planets Paul Beck, 2017-09-26. There is more to outer space than what we can see in the night sky. The Earth as a Distant Planet M. Vázquez, E. Pallé, P. Montañés Rodríguez, 2010-03-12 In *The Earth as a Distant Planet* the authors become external observers of our solar system from a distance and try to determine how one can understand how Earth the third in distance to the central star is essentially unique and capable of sustaining life The knowledge gained from this original perspective is then applied to the search for other planets outside the solar system or exoplanets Since the discovery in 1992 of the first exoplanet the number of planet detections has increased exponentially and ambitious missions are already being planned for the future The exploration of Earth and the rest of the rocky planets are Rosetta stones in classifying and understanding the multiplicity of planetary systems that exist in our galaxy In time statistics on the formation and evolution of exoplanets will be available and will provide vital information for solving some of the unanswered questions about the formation as well as evolution of our own world and solar system Special attention is paid to the biosignatures signs of life detectable in the Earth's reflected spectra and the search for life in the universe The authors are experts on the subject of extrasolar planets They provide an introductory but also very much up to date text making this book suitable for researchers and for advanced students in astronomy and astrophysics

Planetary Vistas Paul Murdin, 2015-06-01 The word landscape can mean picture as well as natural scenery Recent advances in space exploration imaging have allowed us to now have landscapes never before possible and this book collects some of the greatest views and vistas of Mars Venus's Titan Io and more in their full glory with background information to put into context the foreign landforms of our Solar System Here literally are other worldly visions of strange new scenes all captured by the latest technology by landing and roving vehicles or by very low flying spacecraft There is more than scientific interest in these views They are also aesthetically beautiful and intriguing and Dr Murdin in a final chapter compares them to
