Safety Through Design

Key Points

- Safety must begin long before construction ever starts.
- Safety is best achieved by eliminating hazards, not just managing and mitigating them.
- Expanding our basis of design to eliminate hazards holds great promise.

Leading owner organizations are continuing to drive safety performance improvement.

- Increasingly they will represent industry's platinum clients.

Over the years these leading owners have driven safety focus up a value chain that:

- Started with mandatory usage of PPE (personal protective equipment).
- Has administrative controls founded on training and work scheduling.
- Has engineering controls providing isolation, separation, and guarding.
- Through substitution, is driving the industry to use something else or do it a different way.

These safety focused industry leaders are now at the apex of this value chain, namely, designing out the hazard.

Safety Through Design:

Safety Through Design Wayne C. Christensen, Fred A. Manuele, 1999 Fall Prevention Through Design in Construction Imriyas Kamardeen, 2015-06-05 The role of designers has traditionally been to design a building so that it conforms to accepted local building codes The safety of workers is left up to the contractor building the designs Research shows however that designers can have an especially strong influence on construction safety during the concept preliminary and detailed design phases This book establishes the new knowledge and conceptual frameworks necessary to develop a mobile computing enabled knowledge management system that can help reduce the high rate of construction falls There are three main objectives of this book 1 To create a new Prevention through Design PtD knowledge base to model the relationships between fall risks and design decisions 2 To develop a PtD mobile App to assist building designers in fall prevention through design 3 To evaluate the practical implications of the PtD mobile App for the construction industry especially for building designers and workers The cutting edge technologies explored in this book have the potential to significantly reduce the rate of serious injuries that occur in the global construction industry This is essential reading for researchers and advanced students of construction management with an interest in safety or mobile technologies **Safe Design and Construction of Machinery** Elizabeth Bluff, 2017-03-02 The origin of this book is the compelling evidence that a high proportion of machinery related deaths and injuries are attributable to genuine and serious risks originating within machine design and construction This trend continues despite significant legal obligations notably the European regulatory regime giving effect to the Machinery Directive among others and a substantial body of specialist knowledge originating in the disciplines of human factors and safety engineering Grounded in empirical research with machinery manufacturers this book aims to elucidate the factors and processes shaping firms performance for machinery safety and considers their compatibility with legal obligations Through a unique blending of rich empirical data coupled with safety human factors socio legal and learning scholarship the book provides both a nuanced account of firms performance for machinery safety and makes conceptual and theoretical contributions to understanding and explaining their performance Specifically the book elucidates the role of knowledge and motivational factors and how these are constituted in shaping firms performance It reveals the multiple state and non state influences that create plural responses among manufacturing firms which typically operate in supply chains and networks and often globally These insights provide the foundations to enhance regulatory design and the book s conclusion recommends some innovative directions for regulatory interventions to sustain the safe design and construction of machinery *NHB. , **Transforming our World Through Design, Diversity and Education*** Gerald Craddock, Cormac Doran, Larry McNutt, Dónal Rice, 2018-10-15 Good design is enabling and each and every one of us is a designer Universal Design is widely recognized an important concept that should be incorporated in all person centred policies The United Nations Convention on the Rights of Persons with Disabilities UNCPRD clearly stipulates that the most effective way of
