Safety Planning With Battered Women:

Safety Planning with Battered Women Jill M. Davies, Eleanor Lyon, Diane Monti-Catania, 1998 Safety Planning with Battered Women introduces a new model of woman defined advocacy that is designed to bridge the gap that sometimes occurs between a battered woman's perspective and a victim advocate's perception. Created to improve service delivery to women who are victims of domestic violence, this new model emphasizes placing attention on the victim's assessment of the risk in a violent relationship and in her decision making. Authors Jill Davies, Eleanor Lyon, and Diane Monti-Catania strive to help advocates better understand battered women's decisions, including the decision to remain in an abusive relationship, to improve advocacy for victims with varying cultural backgrounds and experiences, and to provide advocates with assistance in redesigning their services so they may better meet the needs of battered women. Since there are no quick fixes to the problems encountered in cases of domestic violence, it is vital that victims be provided with a real understanding of their options and the opportunity to implement those safety plans they deem most feasible. Safety Planning with Battered Women helps advocates tailor alternatives that will enhance the safety of battered women based on the individual realities of battered women. This book is both enlightening and highly practical and is a must read for anyone working with domestic violence victims. By introducing a woman defined model and offering a new approach to advocacy, Safety Planning with Battered Women will compel readers to reexamine current approaches and examine the future provision of services to domestic violence victims, making it a valuable resource for students, researchers, academics, professionals, and practitioners.

Safety Planning with Battered Women Jill Davies, Eleanor Lyon, Diane Monti-Catania, 1998-02-12 Drawing attention to the complexity of helping battered women and their children, this volume introduces a new model of women defined advocacy. The model emphasizes understanding a battered woman's perspective, including her risk analysis and safety plan building, partnerships with battered women, and systems advocacy. It seeks to craft courses of action that will enhance women's safety given their individual realities, which might include, for example, a woman deciding to remain temporarily in an abusive relationship.

Domestic Violence Offenders Alan Rosenbaum, 2014-01-02 Women's shelters and safe houses were a good first step, but they only address part of the problem. Learn what else must be done to address the problem of domestic violence. Domestic Violence Offenders presents recent research, current interventions, and legal standards for people arrested for domestic violence. It also addresses the controversies that have arisen in the wake of the mandatory standards for batterer interventions that have been established by various jurisdictions, examining the type of treatment modality and content permitted by various jurisdictions, the duration of treatment, and the relationship of the various standards to actual research. This essential book also provides suggestions for a more inclusive, less rigid process for creating standards and policies for use with this population. Handy tables and charts make the information easily accessible. From the editors: The initial societal response to intimate partner violence was the development of the shelter movement for battered women.

Women's shelters and or safe houses developed in almost all major population areas throughout the United States and abroad. The goals were to provide a safe environment for abused women and their children to offer advocacy counseling and medical services and to empower women to leave their abusers. While shelters continue to serve these and other critical needs and are an essential part of the service delivery system for battered women, they address only part of the problem. Left untreated, batterers often will continue to abuse their partners who leave shelters and return to the relationship. If their partners leave the relationship, the batterers may find new victims to abuse. The response to this harsh reality was the development of batterer intervention programs. Domestic Violence Offenders provides you with informed discussions of the implications of research and policies for those providing interventions, why it is premature for states to establish certain rigid standards for batterer programs and how some of the current standards may produce more harm than good, the history of batterer intervention programs, completion and recidivism among court and self-referred batterers, the Alternatives to Violence program and the experiences and perceptions of its founder, common aspects of various intervention programs, confidentiality, group structure and length, partner contacts, leadership configuration and program goals, topics addressed by most programs, power and control, anger management, substance abuse, stress reduction, parenting, communication and more, the controversial and often misunderstood issue of female partner aggression and violence, the Stages of Change approach to domestic violence treatment, lethality assessment and safety planning for partners of batterers, the advantages of conjoint therapy for certain types of cases, the Illinois Protocol for batterer programs, outcome research on programs for batterers and a great deal more. Battered Women in the Courtroom James Ptacek, 1999. For the first time, a study of the ways in which judges respond to abused women.
