Saga Of 54 Or More:

Reading the Old Norse-Icelandic "Mariu saga" in Its Manuscript Contexts Daniel C. Najork, 2021-02-08 Mar u saga the Old Norse Icelandic life of the Virgin Mary survives in nineteen manuscripts While the 1871 edition of the saga provides two versions based on multiple manuscripts and prints significant variants in the notes it does not preserve the literary and social contexts of those manuscripts In the extant manuscripts Mar u saga rarely exists in the codex by itself This study restores the saga to its manuscript contexts in order to better understand the meaning of the text within its manuscript matrix why it was copied in the specific manuscripts it was and how it was read and used by the different communities that preserved the manuscripts

In Search of the Culprit Lukas Rösli, Stefanie Gropper, 2021-12-06 Despite various poststructuralist rejections of the idea of a singular author genius the question of a textual archetype that can be assigned to a named author is still a common scholarly phantasm The Romantic idea that an author created a text or even a work autonomously is transferred even to pre modern literature today This ignores the fact that the transmission of medieval and early modern literature creates variances that could not be justified by means of singular authorships The present volume offers new theoretical approaches from English German and Scandinavian studies to provide a historically more adequate approach to the question of authorship in premodern literary cultures Authorship is no longer equated with an extra textual entity but is instead considered a narratological inner and intertextual function that can be recognized in the retrospectively established beginnings of literature as well as in the medial transformation of texts during the early days of printing The volume is aimed at interested scholars of all philologies especially those dealing with the Middle Ages or Early Modern Period

The War Against Rommel's Supply Lines, 1942-1943 Alan Levine, 1999-06-30 An exciting account of a little known yet vital part of World War II the Allied effort to blockade Axis forces in North Africa with a relatively small number of planes and submarines included some of the war s most spectacular air battles and opened the way to the attack on Fortress Europe from the south This is the first book length treatment of the crucial struggle to cut Axis supply lines in the Tunisian campaign of 1942 1943 a battle often ignored or played down even by official historians The campaign marked the first big U S victory against the Axis powers and served as a proving ground for several top Allied commanders This study fills an important gap in the history of the war reevaluating the development of Allied airpower and the role of Italy in the campaign Allied success in interdiction was a critical factor in the greatest Allied victory in the Mediterranean campaign a victory which left the enemy so weakened that it could not stop the subsequent invasion of Europe from the south Despite initial disorganization and early disappointments the British waged one of only two successful submarine campaigns ever fought This study describes some of the war s most amazing air battles notably Operation Flax against the enemy s air transport fleet and attacks on convoys all interwoven with the events of the ground war in the desert and comparisons with the Pacific effort It details the struggle to reorganize and improve the Allied effort the belated success of sea sweeps against enemy ships and the final victory in the

spring of 1943 in which an air blockade was clamped on the sea and sky approaches to Tunisia New Studies in the Manuscript Tradition of Njáls saga Svanhildur Óskarsdóttir, Emily Lethbridge, 2018-10-22 Njáls saga is the best known and most highly regarded of all medieval Icelandic sagas and it occupies a special place in Icelandic cultural history The manuscript tradition is exceptionally rich and extensive The oldest extant manuscripts date to only a couple of decades after the saga's composition in the late 13th century and the saga was subsequently copied by hand continuously up until the 20th century even alongside the circulation of printed text editions in latter centuries The manuscript corpus as a whole has great socio historical value showcasing the myriad ways in which generations of Icelanders interpreted the saga and took an active part in its transmission the manuscripts are also valuable sources for evidence of linguistic change and other phenomena The essays in this volume present new research and a range of interdisciplinary perspectives on the Njáls saga manuscripts Many of the authors took part in the international research project The Variance of Njáls saga which was funded by the Icelandic Research Council from 2011-2013

History of the Literature of the Scandinavian North from the Most Ancient Times to the Present Frederik Winkel Horn, 1883

The Poetic Genesis of Old Icelandic Literature Mikael Males, 2019-12-16 This book assesses the importance of poetry for the Old Icelandic literary flowering of c 1150-1350 It addresses the apparent paradox that an extremely conservative form of literature namely skaldic poetry was at the core of the most innovative literary and intellectual experiments in the period The book argues that this cannot simply be explained as a result of strong local traditions as in most previous scholarship Thus for instance the author demonstrates that the mix of prose and poetry found in kings sagas and sagas of Icelanders is roughly contemporary to the written sagas Similarly he argues that treatises on poetics and mythology including Snorri's Edda are new to the period not only in their textual form but also in their systematic mode of analysis The book contends that what is truly new in these texts is the method of the authors derived from Latin learning but applied to traditional forms and motifs as encapsulated in the skaldic tradition In this way Christian Latin learning allowed for its perceived opposite vernacular oral literature of pagan extraction to reach full fruition and to largely replace the very literature which had made this process possible in the first place

The Medieval Saga Carol J. Clover, 2019-03-15 Written in the thirteenth century the Icelandic prose sagas chronicling the lives of kings and commoners give a dramatic account of the first century after the settlement of Iceland the period from about 930 to 1050 To some extent these elaborate tales are written versions of traditional sagas passed down by word of mouth How did they become the long and polished literary works that are still read today The evolution of the written sagas is commonly regarded as an anomalous phenomenon distinct from contemporary developments in European literature In this groundbreaking study Carol J. Clover challenges this view and relates the rise of imaginative prose in Iceland directly to the rise of imaginative prose on the Continent Analyzing the narrative structure and composition of the sagas and comparing them with other medieval works Clover shows that the Icelandic authors using Continental models owe the prose form of

their writings as well as some basic narrative strategies to Latin historiography and to French romance *History of the Literature of the Scandinavian North from the Most Ancient Times to the Present* Fr. Winkel Horn, 1883 *A Companion to Saxo Grammaticus*, 2024-06-17 Ever since the publication of Saxo Grammaticus *Gesta Danorum* at the beginning of the thirteenth century scholars and laymen have grappled with the complex and marvellous chronicle As much specialized scholarship has been published in Danish this companion breaks new ground by giving a comprehensive and up to date tour of the work for a global audience Attention is given to the unity of Saxo's massive chronicle whether he is dealing with a legendary pagan past or events from his own time Saxo's world and views are explored in ways that shed new light on all of northern Europe Contributors are Bjørn Bandlien Karsten Friis Jensen Michael H Gelting Thomas K Heeb ll Holm Lars Hermanson Lars Kj r Torben Kjersgaard Nielsen Annette Lassen Anders Leegaard Knudsen Lars Boje Mortensen Mia M nster Swendsen Erik Niblaeus Roland Scheel Karen Skovgaard Petersen Kurt Villads Jensen and Helle Vogt **Barbarians in the Sagas of Icelanders** William H. Norman, 2021-07-29 This book explores accounts in the Sagas of Icelanders of encounters with foreign peoples both abroad and in Iceland who are portrayed according to stereotypes which vary depending on their origins Notably inhabitants of the places identified in the sagas as rland Skotland and V nland are portrayed as being less civilized than the Icelanders themselves This book explores the ways in which the slendingas gur emphasize this relative barbarity through descriptions of diet material culture style of warfare and character These characteristics are discussed in relation to parallel descriptions of Icelandic characters and lifestyle within the slendingas gur and also in the context of a tradition in contemporary European literature which portrayed the Icelanders themselves as barbaric Comparisons are made with descriptions of barbarians in classical Roman texts primarily Sallust but also Caesar and Tacitus showing striking similarities between Roman and Icelandic ideas about barbarians
