geopolitics and global maritime trade Lineage Society on the Southeastern Coast of China , Secondary Cities and Urban Networking in the Indian Ocean Realm, C. 1400-1800 Kenneth R. Hall,2008-01-01 This volume features the research of international scholars whose work addresses the representative history of small cities and urban networking in various parts of the Indian Ocean world in an era of change allowing them the opportunity to compare approaches methods and sources in the hopes of discovering common features as well as notable differences Chinese Encyclopaedias of New Global Knowledge (1870-1930) Milena Doleželová-Velingerová,Rudolf G Wagner,2013-08-04 This is a set of pioneering studies on Chinese encyclopaedias of modern knowledge 1870 1930 At a transitional time when modern knowledge was sought after yet few modern schools were available these works were crucial sources of information for an entire generation This volume investigates many of these encyclopaedias which were never reprinted and are hardly known even to specialists for the first time The contributors to this collection all specialize in the period in question and have worked together for a number of years The resulting studies show that these encyclopaedias open a unique window onto the migration and ordering systems of knowledge across cultural and linguistic borders **The Japanese Discovery of Chinese Fiction** William C. Hedberg,2019-10-15 The classic Chinese novel The Water Margin Shuihu zhuan tells the story of a band of outlaws in twelfth century China and their insurrection against the corrupt imperial court Imported into Japan in the early seventeenth century it became a ubiquitous source of inspiration for translations adaptations parodies and illustrated woodblock prints There is no work of Chinese fiction more important to both the development of early modern Japanese literature and the Japanese imagination of China than The Water Margin In The Japanese Discovery of Chinese Fiction William C Hedberg investigates the reception of The Water Margin in a variety of early modern and modern Japanese contexts from eighteenth century Confucian scholarship and literary exegesis to early twentieth century colonial ethnography He examines the ways Japanese interest in Chinese texts contributed to new ideas about literary canons and national character By constructing an account of Japanese literature through the lens of The Water Margin s literary afterlives Hedberg offers an alternative history of East Asian textual culture one that focuses on the transregional dimensions of Japanese literary history and helps us rethink the definition and boundaries of Japanese literature itself **History of Technology Volume 29** Ian Inkster,2016-09-30 The common question from the western point of view is of the sort why did China lose its early leadership of productive technologies to Europe during the early modern period Answers to this seemingly clear enquiry vary from general cultural inwardness to the interferences of imperial governance This collection surveys such theories but alters the issue by raising the notion that Chinese technologies did not so much fail as move along a path different from that of Europe Our second collection on the Mindful Hand also shifts common ground by querying and modifying common views of the links between knowledge and technique in early modern European development Scientific or related knowledge was not brought to technique as a socio cultural gift from an educated elite to the working man Rather
