Salmon Decline Of The Bc Fish:

Salmon Geoff Meggs, 1991 **Geography of British Columbia, Third Edition** Brett McGillivray, 2011-01-01 Why is British Columbia unique within Canada What forces have made its landscape so rugged its population so diverse How have its resources been exploited and managed in the past and in the present Brett McGillivray adopts mainly a thematic rather than a regional approach to answer these questions Beginning with a regional overview and introduction to geographic concepts he then moves to discuss the physical processes that produced a spectacular variety of mountains lakes fjords forests and minerals His thematic exploration traces the province's historical geography including First Nations lifeways colonization Asian immigration and institutionalized racism Detailed accounts of BC's economic geography forestry fisheries mining energy supply and demand agriculture water and tourism culminate in a discussion of contemporary issues such as urbanization economic development and resource management This fully revised edition is enhanced by updated figures maps and graphs and by new discussions including how globalization climate change and recession are influencing the province and its people **Landings and Receipts of Fishery Products at Seattle, Washington and Certain Pacific Coast Ports** , **Marine Fisheries Review** , 1990 **NOAA Technical Report NMFS SSRF**. United States. National Marine Fisheries Service, 1971 **Landing Native Fisheries** Douglas C. Harris, 2009-01-01 Landing Native Fisheries reveals the contradictions and consequences of an Indian land policy premised on access to fish on one hand and a program of fisheries management intended to open the resource to newcomers on the other Beginning with the first treaties signed on Vancouver Island between 1850 and 1854 Douglas Harris maps the connections between the colonial land policy and the law governing the fisheries In so doing Harris rewrites the history of colonial dispossession in British Columbia offering a new and nuanced examination of the role of law in the consolidation of power within the colonial state **The Economics and Management of World Fisheries** Trond Bjørndal, Gordon Munro, 2012-10-25 Over the past several decades there has been increasing interest in and concern about the economics of the world's capture fishery resources Massive amounts of resource rent are being lost because of inadequate management and major rebuilding of fishery resources is called for This book draws together the latest economic theory of the management of these resources at both the national and the international levels and highlights areas where further research is urgently required The emphasis is on world capture fisheries rather than fisheries of specific regions and examples are drawn upon from both developed and developing countries It combines economic theory and empirical testing with an examination and analysis of resource policy options with particular emphasis on fisheries management policies at the international level where some of the most difficult resource management problems are found The authors maintain that capture fishery resources are properly viewed as a part of society's portfolio of natural capital assets Consequently a central theme of the book is that managing such resources should be viewed as asset management through time Written by two leading authorities this accessible textbook has been specially developed to meet

the needs of students taking courses on fisheries management as well as professionals working in this area for governments and international organisations
