## **Salt White Gold Of The Ancient Maya:**

SALT: WHITE GOLD of the ANCIENT MAYA Heather McKillop, 2008-11 McKillop has completed a remarkable task in bringing out significant new data concerning ancient Maya salt making. The implications of environmental exploitation, technological development, and economic possibilities provide the opportunity to revisit these issues on more solid ground. Fred Valdez Jr, University of Texas Austin. Long accepted ideas about Late Classic activities and the role of coastal communities in supporting Late Classic society even the society of Tikal and the Peten will now have to change as the result of McKillop's findings. Elizabeth Graham, University College London. In *Salt White Gold of the Ancient Maya* Heather McKillop reports the discovery, excavation, and interpretation of Late Classic Maya salt works on the coast of Belize, transforming our knowledge of the Maya salt trade and craft specialization while providing new insights on sea level rise in the Late Holocene as well. Salt, basic to human existence, was scarce in the tropical rainforests of Belize and Guatemala where the Classic Maya civilization thrived between A.D. 300 and 900. The prevailing interpretation has been that salt was imported from the north coast of the Yucatan. However, the underwater discovery and excavation of salt works in Punta Yucacos Lagoon demonstrate that the Maya produced salt by boiling brine in pots over fires at specialized workshops on the Belizean coast. The Punta Yucacos salt works are clear evidence that craft specialization took place in a nondomestic setting and that production occurred away from the economic and political power of the urban Maya rulers, thus providing new clues to the Maya economy and sea trade. McKillop also presents new data on sea level rise in the Late Holocene that extend geologists' and geographers' sea level curves from earlier eras. Likewise, she enters the environmental versus cultural debate over the Classic Maya collapse by evaluating the factors that led to the abandonment of the Punta Yucacos salt works at the end of the Classic Period, synonymous with the abandonment of inland Maya cities. Heather McKillop is associate professor of anthropology at Louisiana State University.

The Ancient Maya Heather Irene McKillop, 2003 **The Ancient Maya** Heather McKillop, 2004-08-19 Thanks to powerful innovations in archaeology and other types of historical research, we now have a picture of everyday life in the Mayan empire that turns the long-accepted conventional wisdom on its head. Ranging from the end of the Ice Age to the flourishing of Mayan culture in the first millennium to the Spanish conquest in the 16th century, *The Ancient Maya* takes a fresh look at a culture that has long held the public's imagination. Originally thought to be peaceful and spiritual, the Mayans are now also known to have been worldly, bureaucratic, and violent. Debates and unanswered questions linger. Mayan expert Heather McKillop shows our current understanding of the Maya, explaining how interpretations of dirt, archaeology, hieroglyphic inscriptions, and pictorial pottery are used to reconstruct the lives of royalty, artisans, priests, and common folk. She also describes the innovative focus on the interplay of the people with their environments that has helped further unravel the mystery of the Mayans' rise and fall.

Maya Salt Works Heather McKillop, 2019-05-01 This book includes evaluation of the economics of salt production and trade from analyses of the spatial patterning of wooden buildings and

associated artifacts that were mapped on the sea floor at the Paynes Creek Salt Works The book describes the discovery and mapping of the wooden architecture as well as the associated pottery and other artifacts on the surface and embedded in the sea floor during a systematic search for salt production in a large salt water lagoon system Punta Ycacos Lagoon in southern Belize

**Salt in the Earth** Mualla Cengiz, Savas Karabulut, 2020-03-25 Salt is a predominant compound for humankind and the earth preserves an important source of this element of life This book reviews this multi disciplinary issue in which geoscientists historians agriculturalists medical doctors and general scientists have been interested in its nature The authors have provided contributions on the origin and history of salt intrusion with freshwater effect its usability as a material and its role in life The safety of groundwater resources should be a priority for humanity Contribution on this important topic is provided by geophysical investigations to characterize saltwater intrusions in aquifers This book also presents a general overview on salt intake and its role in food and human health Methods of salt recovery and surface salination as well as its usage in the environment will provide new aspects in earth science

**In Search of Maya Sea Traders** Heather Irene McKillop, 2005 Stone temples rising above the rainforest canopy and elaborate hieroglyphs carved onto stone monuments give silent testimony to the high culture of the Maya ancestors of the indigenous peoples of Central America They have inspired generations of archaeologists professional and avocational to take to the field in search of the past One such archaeologist is Heather McKillop who in 1979 first visited the coast of Belize in

search of a little known aspect of ancient Maya life the sea trade that helped move salt obsidian coral and other goods around the interior of the empire In 1982 she began bringing volunteers and students to the islands off the coast of Port Honduras Belize Since then she has returned many times to excavate sites that reveal the scope and diversity of the trade that passed by water throughout the Maya world In this book McKillop tells the story of the search for the Maya sea traders as well as the story of the traders themselves as it emerges from the excavations In *Search of Maya Sea Traders* describes the trading port of Wild Cane Cay where exotic obsidian jade gold and other goods including highly crafted pots were traded from distant lands McKillop also tells us about the more coastal inland trade of salt seafood and other marine resources Through the story of her own work and that of her students and volunteers McKillop models both the research design and the field work that are required to interpret the civilizations of the past She includes the adventure of discovery the challenges of working in wild environments from snakes and rising sea levels to falling coconuts and the tedium of daily measured digs in a near tropical setting Through her experiences the reader also gets to know some of the local residents of Port Honduras and Wild Cane Cay descendants of the ancient Maya In *Search of Maya Sea Traders* will appeal to that part of each of us that longs to explore distant places and cultures in quest of a seldom glimpsed past

*The Value of Things* Jennifer P. Mathews, Thomas H. Guderjan, 2017-04-11 L ditteur indique This book explores how the Mayans gave value to commodities through the lens of anthropology and archaeology

*Social Identities in the Classic Maya Northern Lowlands* Traci Ardren, 2015-04-15 Social Identities in the Classic Maya Northern Lowlands plumbs the archaeological record for what it can reveal about the creation of personal and communal identities in the Maya world Using new primary data from her excavations at the sites of Yaxuna Chunchucmil and Xuenkal and new analysis of data from Dzibilchaltun in Yucatan Mexico Traci Ardren presents a series of case studies in how social identities were created shared and manipulated among the lowland Maya Ardren argues that the interacting factors of gender age familial and community memories and the experience of living in an urban setting were some of the key aspects of Maya identities She demonstrates that domestic and civic spaces were shaped by gender specific behaviors to communicate and reinforce gendered ideals Ardren discusses how child burials disclose a sustained pattern of reverence for the potential of childhood and the power of certain children to mediate ancestral power She shows how small shrines built a century after Yaxuna was largely abandoned indicate that its remaining residents used memory to reenvision their city during a time of cultural reinvention And Ardren explains how Chunchucmil s physical layout of houses plazas and surrounding environment denotes that its occupants shared an urban identity centered in the movement of trade goods and economic exchange Viewing this evidence through the lens of the social imaginary and other recent social theory Ardren demonstrates that material culture and its circulations are an integral part of the discourse about social identity and group membership

**Cultures of Commodity Branding** Andrew Bevan, David Wengrow, 2016-06-16 Commodity branding did not emerge with contemporary global capitalism In fact the authors of this volume show that the cultural history of branding

stretches back to the beginnings of urban life in the ancient Near East and Egypt and can be found in various permutations in places as diverse as the Bronze Age Mediterranean and Early Modern Europe What the contributions in this volume also vividly document both in past social contexts and recent ones as diverse as the kingdoms of Cameroon Socialist Hungary or online eBay auctions is the need to understand branded commodities as part of a broader continuum with techniques of gift giving ritual and sacrifice Bringing together the work of cultural anthropologists and archaeologists this volume obliges specialists in marketing and economics to reassess the relationship between branding and capitalism as well as adding an important new concept to the work of economic anthropologists and archaeologists
