ideologies and practices are addressed In the same vein this book also places emphasis on the importance of institutional quality assurance mechanisms accreditation learning outcomes and multicultural connectivity through an inclusive curriculum Lastly in providing thorough strategies for comprehensive internationalisation of higher education this book provides pertinent discussions on the sustainable funding models for the HEIs repositioning the higher education sector as a vibrant export sector reforms in higher education governance in HEIs entrepreneurship in higher education and competition in higher education

International Trends in University Governance Michael Shattock,2014-06-05 Governance is becoming increasingly important in universities just as it is in the wider world of commerce and banking Historically universities were run by their academic communities but as mass higher education has taken root as university research has become a critical element in national economies and as the demand for more accountability both financial and in academic performance has grown pressure has mounted for a modernisation of governance structures One aspect of modernisation particularly important in many European systems and in Japan has been the decision by governments to give institutions greater autonomy more control over their budgets and legal responsibility for the employment of their staff International trends to introduce greater competition between institutions to encourage greater institutional differentiation and give greater play to market forces has led to an emphasis on leadership a more systematic involvement of external stakeholders and a more corporate style of governance At the same time this has often led to a sense of loss of collegiality a redistribution of authority and a growing gap between the centre and the periphery within universities This book analyses governance change in nine major higher education systems Australia Finland France Germany Italy Japan Norway the UK and the USA each account being the result of independent research by a leading authority in the field and describes how a convergence of governance structures has been mediated by the historical cultural political and social characteristics of the different systems Michael Shattock is a leading authority on university governance this study offers the most up to date account of governance reform in a range of higher education systems an analysis of the common trends and an assessment of their impact on the idea of a university It will be essential reading for academics postgraduates and practitioners in higher education

By the Power Vested in Me Michael Stambolis-Ruhstorfer,2025-06-03 In both the United States and France each side of the legal battle over same sex marriage and parenthood relied heavily on experts Despite the similarity of issues however lawmakers in each country turned to different sets of authorities from economists and

psychoanalysts to priests and ordinary people They even prized different types of expertise empirical research in the United States versus abstract theory in France Exploring the legalization of same sex marriage in the United States and France this book sheds new light on the power of experts to influence high stakes democratic debates Drawing on extensive interviews and ethnographic observation Michael Stambolis Ruhstorfer traces the divergences between the two countries showing why some experts are ubiquitous in one but absent in the other He argues that lawmakers judges lawyers journalists and activists covet something only experts can provide the credibility and aura of authority or expert capital which they deploy to advance their agendas Expert capital is not derived from scientific or technical merit alone but is produced through cultural norms material resources and social relationships which vary greatly across national contexts Through the story of the fight over gay rights By the Power Vested in Me reveals how and why certain experts but not others obtain the authority to shape public opinion and policy At a time of soaring public distrust in experts this book offers new ways to understand the contested political role of expertise and its consequences
