Stress and the Family Volume I: Coping With Normative Transitions, Hamilton I. McCubbin and Charles R. Figley. New York, Brunner/Mazel, 1983. 216 pp. \$22.50, hardcover.

Coping With Normative Transitions is the first of two volumes that employ sociology research to focus on family stress. McCubbin and Figley have expanded the pioneering work of Reuben Hill into a general model of stress and family coping. As the editors state in their introduction, "Normative stressors and crises refer to those changes or life cycle transitions that are expected and predictable, which most or even all families will experience over the life cycle, and which require adjustment and adaptation. Stress is part of that developmental process" (p. xx). They delineate two sources of stress: normal life cycle transitions and unpredictable, catastrophic events.

Volume I begins with a conceptual chapter by McCubbin and Patterson outlining their theoretical model for understanding stress and the family's functional and dysfunctional coping patterns. Subsequent chapters, by contributors, consider two categories of stress: (a) family transitions (the life cycle) and (b) environmental demands on the family, such as work, societal stress (in the black family), environmental stress (in the rural family), and economic stress.

The editors gave each contributing author a set of objectives and specific questions within which to frame their essays. These involved understanding the family system as a stress absorber and stress producer, highlighting the particular stress in each life cycle phase, identifying important areas of research in the family stress field, and developing effective interventions for helping families to cope. This format gives the book a coherent structure.

McCubbin's and Patterson's chapter is one of the best, a concise presentation of their Double ABCX Model for understanding stress and the family's ability to cope. They define family stress as "a state that arises from an actual or perceived imbalance between demand (e.g., challenge, threat) and capability (e.g., resources, coping) in the family functioning" (p. 10). The Double ABCX Model is based on Hill's model. As Hill (2) describes it, "A (the stressor/crisis-provoking event), interacting with B (the family's crisis-meeting resources), interacting with C (the definition the family makes of the event), produces X (the crisis).

This model has become the cornerstone of family stress literature. It focuses on the precrisis variables that influence a family's ability to cope with stress. These variables determine whether the outcome will be a crisis for a particular family. McCubbin *et al.* have expanded the model to the *Double ABCX Model*, a more dynamic concept. In the Double Model, each factor is further developed: Aa, Bb, Cc. Thus, Aa implies the *pileup* of demands? the sum of many stressors, normative and nonnormative, that occur together. A given stressor (say, loss of father's job) can happen during the normal life cycle transition of another family member (son's adolescence), at a time that the family is already coping with strain (grandfather's death) and with the consequences of the family's shift in roles (mother went to work), all interacting to unbalance family stability. The factor Bb, family adaptation, describes the new structure needed to adapt to the pileup of stress, such as modification of roles, rules, and patterns of interaction. Adaptation is consolidated not only by intrafamily shifts but with the help of the family's natural support systems.

I wholeheartedly agree with the application of the stress concept to the life cycle. As a family therapist, this framework has always helped me to understand clinical dilemmas. Carter and McGoldrick (1) have presented the emotional tasks faced by the family system at each phase of its life cycle. Adding the Double ABCX Model allows us to look more closely at the configuration of stressors and coping efforts that result in some families' inability to adapt or to move to the next stage.

This volume seems to be addressed to an audience with varying levels of experience, and the roster of contributors reflects this diversity. Although all the authors follow the editors' format, there is wide variation in emphasis. Some focus more on reviewing the literature, others take a sociological approach, and still others write clinically. This diversity results in strengths and weaknesses, and overall I think the book works best for the student and the general reader. Experienced therapists may find some chapters oversimplified and trailing well behind the conceptual model. Among the most informative sections are those on marriage, sexuality, divorce, and the black family. The chapter on adolescence provides a beautiful synthesis of the model with a family systems point of view. The chapter on stepparenting, also outstanding, augments the stress model with direct clinical implications and recommendations.

In summary, Volume I is an ambitious work with wide relevance. For the student, it offers a rich overview of the family stress field and the family life cycle. The experienced clinician is well rewarded by this conceptual model and some of its applications but may be left desiring a stronger clinical and systems focus.

condition and characteristics of the black family have been subjects of intense debate since at least the 1960s when the Moynihan Report and the culture of poverty theses held sway. Since then a consistent theme has been that black families are pathological. Despite the fact that research has been inconclusive and contradictory, political debate and policy have been strongly influenced by the pathology theme. This volume presents alternative approaches toward understanding the special characteristics of black families. Extending a special issue of *The Review of Black Political Economy*, the book focuses on the economic circumstances and decision making of these families, employing interdisciplinary and cross-cultural perspectives. It examines the general responses of black families to various external factors such as economic systems and to internal factors such as interpersonal relationships. This compendium of current thinking and research will be of interest to professionals in a number of fields, including family studies, counseling, social work, psychology, and sociology. It will be of practical use in training programs for service delivery systems. Interested in incorporating multicultural perspectives as well as those specifically interested in black families today.

Educational Resilience in inner-city America Margaret C. Wang, Edmund W. Gordon, 2012-10-12 The story of life in inner-city America and the education of its people is often recounted as a tragedy; the ending is often predictable and usually dire, highlighting deficiency, failure, and negative trends. As with most social problems, children and youth in the inner cities are hit hardest. But this dismal view is only half of the full picture. The cities of our nation are a startling juxtaposition between the despairing and the hopeful, between disorganization and restorative potential. Alongside the poverty and unemployment, the street fights and drug deals are a wealth of cultural, economic, educational, and social resources. Often ignored are the resilience and the ability for adaptation which help many who are seemingly confined by circumstance to struggle and succeed in the face of the odds. This book helps to broaden the utilization of ways to magnify the circumstances known to enhance development and education so that the burden of adversity is reduced and opportunities are advanced for all children and youth, especially the children and youth of the inner cities who are in at-risk circumstances. The focus is on raising consciousness about the opportunities available to foster resilience among children, families, and communities and synthesizing the knowledge base that is central to implementing improvements which serve to better the circumstances and educational opportunities of children and families. This volume is intended for a wide audience of readers, but particularly those who are in a position to shape public policy and deliver educational and human services.

Famous Marriages Jerry M. Lewis M. D., Jerry Lewis, 2005-11 Everyone brings differing expectations and a variable capacity for compromising to the marital relationship. These personality characteristics play a large role in determining how satisfying the relationship will be perceived as being. By studying the marriages of ten famous couples, including Franklin and Eleanor Roosevelt, The Duke and Duchess of Windsor, and Robert and Elizabeth Barrett Browning, Dr. Jerry M. Lewis examines what they can teach us about what works and what doesn't work in constructing this life-altering relationship. Dr. Lewis relies on over thirty years of research on marital family systems. His studies focus on the important differences between those

relationships that promote growth heal early wounds or are destructive to all concerned Marriages are for better or worse They encourage the individual psychological maturity of husbands and wives as well as their children But when it s severely dysfunctional it may contribute to the development of psychiatric disorders Marriage and other long term committed relationships also decisively influence life satisfaction physical health and the establishment of life s meaning Learn from the mistakes and triumphs of famous marriages to make your own marriage stronger and healthier *Ordinary Magic* Ann S. Masten,2025-05-28 Fully updated with key advances in theory methods and research the second edition of this landmark work features an expanded conceptual framework and a more global perspective on threats to human development including climate change war poverty racial injustice and pandemics Pioneering resilience expert Ann S Masten illuminates the ordinary but powerful processes that allow many children exposed to trauma and adversity to survive adapt and even thrive The book traces fundamental adaptive systems that have evolved and function synergistically at the neurobiological psychological social community and cultural levels Using a range of case examples to illustrate complex concepts Masten provides a cogent resilience framework for promoting positive development in children at risk New to This Edition Advances in neurobiology more international including non Western findings and examples new discussions of cultural identity development up to date intervention research and more Heightened focus on the interactions of multiple systems including families schools culture and communities in supporting children s resilience Increased attention to the impact of structural inequality poverty and intergenerational trauma Coverage of rapidly emerging threats the risks posed to children by multisystem cascading disasters such as the COVID 19 pandemic **Marriage A Search For Healing** Jerry M. Lewis,2013-06-17 This work reveals those key elements that make for greater bonding with couples in therapy The author believes that improvement in the couples he treats almost always involves greater closeness and the development of greater capacity for intimacy Change can come about in different ways for different couples For some insight appears to play to play an important role Learning about one s central problematic relationship of childhood and its re enactment with one s partner in adult life frequently involves also learning about the ways one subtly recreates this dysfunctional relationship structure For others improvement appears to be closely related to experiencing new ways of dealing with conflict This avenue of improvement relies in part on the understanding but even more on learning the approaches to conflict resolution It is as if these couples need to hear over and over again the recordings that document their insensitivities and consequent failure They must offer Each Other The Experiences That Are Emotionally Supportive And Crucial for emotional and physical health and also give life its meaning Finally the treatment approach outline also has significant effects on the therapists Indeed it may be difficult to know who learns most Involvement as a couples therapist may have all sorts of impact on the therapists and it will come as surprise that it is in the area of the therapist s capacity for intimacy that the greatest effect can be experienced *Swimming Upstream* Jerry M. Lewis,2013-10-28 First published in 1991 The experiential base from which

this book is written the author s seminar for psychiatric residents which emphasizes that self disclosure with colleagues is an important aspect of becoming a therapist The ability to look at and listen to one s own work along with one s peers is important in the maturation process In order to construct a context in which it is possible to learn from each other I share many of my own psychotherapeutic experiences More than this however Lewis shares personal experiences when they seem appropriate to the teaching learning process
