Secret Agent X Brant House, 2004-07-01 From the pages of the September 1935 issue of *Secret Agent X* comes this sensational full length novel. Legions of the Living Dead From nowhere hurtled that black death car. And from nowhere came its grisly occupants. They were not of the earth for their human flesh was immune to bullets. They were not of the grave for they manned the wheel and a blasting machine gun. Secret Agent X made a desperate maneuver to block their invasion of the land of the living. And in that weird terror trap he came face to face with a man he knew, a man he knew had died five years ago.

English Text J.R. Martin, 1992-11-18 This book is a comprehensive introduction to text-forming resources in English, along with practical procedures for analysing English texts and relating them to their contexts of use. It has been designed to complement functional grammars of English, building on the generation of discourse analysis inspired by Halliday and Hasan's *Cohesion in English*. The analyses presented were developed within three main theoretical and applied contexts: i) educational linguistics, especially genre-based literacy programmes; ii) critical linguistics, as manifested in the development of social semiotics; and iii) computational linguistics, in dialogue with the various text generation projects based on systemic approaches to grammar and discourse. *English Text*'s major contribution is to outline one way in which a rich semantically oriented functional grammar can be systematically related to a theory of discourse semantics, including deconstruction of contextual issues, i.e. register, genre, and ideology. The chapters have been organized with the needs of undergraduate students in theoretical linguistics and postgraduate students in applied linguistics in mind.
