focused on the civilian nuclear deal as a turning point this book presents an alternative account for this change by analyzing how India's identity has been constructed in different terms after the Cold War. It examines the underlying discourse and explains how this enables or constrains US foreign policymakers when they establish security policies with India and improve US-India relations.

China - U.S. Relations in the 21st Century, 1996 The Rise of East Asia Mark Berger, Douglas Borer, 2002-09-11 There is great interest in the Pacific Century and what its implications for the future will be. The rapid economic growth of East Asia was already setting the region apart from the rest of the world by the 1970s. By the 1980s the trend was seen to have spread southward to Thailand, Malaysia, and Indonesia, while China's provinces had also become integral to the regional economic boom. In this exciting new study, many of the ideas and expectations associated with the Pacific Century are placed under critical scrutiny. The book includes studies of particular countries such as China, Japan, South Korea, Vietnam, Indonesia, and Malaysia. There is analysis of economic and political trends in the region, the reasons behind its rise, and its importance on a global scale. The rise of East Asia represents an historic turning point with immense significance world-wide. This book will be of interest to anyone concerned about the new approaches to and the debate about the rise of East Asia and the coming of the Pacific Century.

Security In Korea Phil Williams, Donald M Goldstein, 2019-07-11 An erratic aging North Korean leadership intent on dynastic succession and development of nuclear weapons is attracting a lot of attention in the Asia Pacific Region, an area of utmost importance to the United States. Current concerns about security in Korea provide the backdrop to this volume, which offers an overview of the evolution of security on the Korean peninsula and an assessment of the U.S. role there from the 1940s to the present. A distinctive feature of this volume is the long historical perspective that is brought to bear on contemporary security dilemmas. The renowned contributors examine U.S. policy prior to and during the Korean War and look at the subsequent changes in U.S. commitment to South Korea during a period of global stalemate that had been shaped in part by the war itself. The authors then assess the future of U.S.-Korean relations within the context of the changing international environment, considering the prospects for future strife, the merits of a cooperative security system, and the possibility of reunification.

China and East Asia's Post-Crises Community Wei Liang, Faizullah Khilji, 2012-10-04 China and East Asia's Post Crises Community A Region in Flux by Wei Liang and Faizullah Khilji explores how an East Asian community is taking shape as a result of China's emergence as a global economic power and the shocks of the financial crises emanating from the globalized financial system Today's East Asia shows a sharp break from the East Asia of the Cold War era in both basis and orientation Important elements in this shift include the regional economic integration propelled by China's emergence as a processed manufacturing center in the world economy the common problems posed by the working of the dollar based international financial system and the desire to develop institutions that help to formalize the economic integration and financial cooperation that is taking place and may thus help protect and safeguard economic prosperity in the region Liang and Khilji show how the approach to regional economic cooperation and developing institutions comes from the bottom up lacking any leader nation grand vision or ideology The manner in which the region comes to work together also has implications for the governance of the world economy in particular the economic model that underlies policy formulation the working of the international financial system and the approach to the multilateral trading system From a security oriented US centric regional structure characterized as the hub and spokes system set up after the Second World War this region is now more nearly an informal economic community which increasingly appears to be China centric China and East Asia's Post Crises Community presents one of the first attempts to weave together different strands of the current discussion to develop a framework for understanding a rapidly evolving East Asia region
