The SAGE Handbook of Survey Methodology Christof Wolf, Dominique Joye, Tom W. Smith, Yang-chih Fu, 2016-07-11. Survey Methodology is becoming a more structured field of research deserving of more and more academic attention. The SAGE Handbook of Survey Methodology explores both the increasingly scientific endeavour of surveys and their growing complexity as different data collection modes and information sources are combined. The handbook takes a global approach with a team of international experts looking at local and national specificities as well as problems of cross national comparative survey research. The chapters are organized into seven major sections, each of which represents a stage in the survey life cycle: Surveys and Societies, Planning a Survey, Measurement, Sampling, Data Collection, Preparing Data for Use, Assessing and Improving Data Quality.
