Marvin James Van Wagenen

Methuselah Manual:

The Infant School Manuals Mrs. Howland, 1835 **The Methuselah Manual** David C. Gardner, Grace Joely Beatty, 1985

The authors read the popular literature on how to prevent illness and maintain vigorous health through nutrition exercise yoga and meditation They found two essential items missing the psychological aspects and a holistic approach was not considered **The Gift of Sublimation** Donald Capps, Nathan Carlin, 2015-09-24 Today diversity of gender and sexuality is beginning to be recognized and celebrated even while many religious denominations still resist these cultural changes The Gift of Sublimation offers pastoral interpretations of these social shifts in the light of psychological principles and argues that there is historically not only one view of masculinity but multiple conceptions This discussion covers topics as diverse as the moral disapproval of masturbation the efforts of some churches to convince homosexual men to adopt a heterosexual orientation the dynamics of male envy of female longevity the homosexual tendencies of King James I of England and VI of Scotland and biblical portraits of God's body gender and sexuality Nathan Carlin and Donald Capps make special use of the psychoanalytic concept of sublimation the redirection of sexual desires that are considered unacceptable or unworthy towards interests and aspirations that are considered acceptable and worthy While the use of psychoanalytic hermeneutics here is likely to raise various red flags for potential religious readers especially for those who have been informed that Sigmund Freud was hostile towards religion this book presents a rather different view focussing on religious sublimation

Methuselah's Zoo Steven N. Austad, 2023-08-15 Stories of long lived animal species from thousand year old tubeworms to 400 year old sharks and what they might teach us about human health and longevity Opossums in the wild don't make it to the age of three our pet cats can live for a decade and a half cicadas live for seventeen years spending most of them underground Whales however can live for two centuries and tubeworms for several millennia Meanwhile human life expectancy tops out around the mid eighties with some outliers living past 100 or even 110 Is there anything humans can learn from the exceptional longevity of some animals in the wild In Methuselah's Zoo Steven Austad tells the stories of some extraordinary animals considering why for example animal species that fly live longer than earthbound species and why animals found in the ocean live longest of all Austad the leading authority on longevity in animals argues that the best way we will learn from these long lived animals is by studying them in the wild Accordingly he proceeds habitat by habitat examining animals that spend most of their lives in the air comparing insects birds and bats animals that live on and under the ground from mole rats to elephants and animals that live in the sea including quahogs carp and dolphins Humans have dramatically increased their lifespan with only a limited increase in healthspan we're more and more prone to diseases as we grow older By contrast these species have successfully avoided both environmental hazards and the depredations of aging Can we be more like them **Yoga Journal** , 1984-11 For more than 30 years Yoga Journal has been helping readers achieve the balance and well being they seek in their everyday lives With every issue Yoga Journal strives to inform and empower
