San Diego's Hybrid Urban Borderlands Albert Rossmeier,2023-08-29 This study aims for a wider understanding of the redevelopment processes that emerged several decades ago in downtown San Diego and now gradually spread over the downtown edges into the inner ring. Perspectively situated in the fields of urban landscape and urban border studies, the research project outlines how the eastward redevelopment wave in San Diego contests socialized neighborhood boundary perceptions by transforming the former first tier suburbs from disinvested communities into urban villages and trendy places to be. The study shows how the redevelopment perforates, dissolves, and shifts socialized linear neighborhood boundaries into areas that are simultaneously part of the one and the other neighborhood. In the present work, the resulting rather undefined or stretched border areas have been referred to as hybrid urban borderlands. This notion is a novel conceptual approach that can be deemed a promising lens for future studies on neighborhood change, urban redevelopment, and socio-spatial re-interpretation beyond the context of San Diego.

Sustainable Development in the USA Jean-Marc Zaninetti,2013-03-28 After WWII the United States of America proposed their way of life based on an unlimited consumption of land, goods, and energy as a model for the entire world. Nowadays, this expansionist model has reached its limits. This book provides a comprehensive study of the geographical basis of the American settlements, assuming that part of the U.S. overshooting is related to geography because of harsh climates and the continental size of the Nation, but another part is the result of cultural habits of expansion and segregation. Urban Sprawl, for instance, is the real Achilles' heel of America because it challenges the cultural revolution required by sustainability. From the continental physiography to the New Orleans/Katrina case, this book explores these issues with maps and charts created with the help of a nationwide multi-scalar GIS.

Paradise Plundered Steven P. Erie, Vladimir Kogan, Scott A. MacKenzie,2011-08-15 The early 21st century has not been kind to California's reputation for good government. But the Golden State's governance flaws reflect worrisome national trends with origins in the 1970s and 1980s: growing voter distrust with government, a demand for services but not taxes to pay for them, a sharp decline in enlightened leadership and effective civic watchdogs, and dysfunctional political institutions have all contributed to the current governance malaise. Until

recently San Diego California America's 8th largest city seemed immune to such systematic governance disorders This sunny beach town entered the 1990s proclaiming to be America's Finest City but in a few short years its reputation went from Futureville to Enron by the Sea In this eye opening and telling narrative Steven P Erie Vladimir Kogan and Scott A MacKenzie mix policy analysis political theory and history to explore and explain the unintended but largely predictable failures of governance in San Diego Using untapped primary sources interviews with key decision makers and public documents and benchmarking San Diego with other leading California cities Paradise Plundered examines critical dimensions of San Diego's governance failure a multi billion dollar pension deficit a chronic budget deficit inadequate city services and infrastructure grandiose planning initiatives divorced from dire fiscal realities an insulated downtown redevelopment program plagued by poorly crafted public private partnerships and for the metropolitan region inadequate airport and port facilities a severe underinvestment in firefighting capacity despite destructive wildfires and heightened Mexican border security concerns Far from a sunny story of paradise and prosperity this account takes stock of an important but understudied city its failed civic leadership and poorly performing institutions policymaking and planning Though the extent of these failures may place San Diego in a league of its own other cities are experiencing similar challenges and political changes As such this tale of civic woe offers valuable lessons for urban scholars practitioners and general readers concerned about the future of their own cities

Catalysts for Change Maria Martinez-Cosio, Mirle Rabinowitz Bussell, 2013-05-29 Winner of the Community Development Society's 2014 Current Research Award 21st Century Philanthropy and Community fills a gap in the literature on philanthropic

organizations and how they intertwine with community development Drawing first on the history of philanthropic funding Maria Martinez Cosio and Mirle Bussell look at developments in the last twenty years in detail focussing on five key case studies from across America The authors use their own first hand experiences and research to forge a new path for academic research in an area where it has been lacking With the current economic climate forcing shrewd spending foundations need all the guidance they can find on how to appropriately channel their funds in the best way But how can these sorts of community projects be analyzed for effectiveness Is there a quantitative rather than qualitative element which can be studied to give real feedback to those investing in projects Arguing against a one size fits all model the authors illustrate the importance of context and relationships in the success of these projects

Toronto Edward Relph, 2013-08-22 Extending a hundred miles across south central Ontario Toronto is the fifth largest metropolitan area in North America with the highest population density and the busiest expressway At its core old Toronto consists of walkable neighborhoods and a financial district deeply connected to the global economy Newer parts of the region have downtown centers linked by networks of arterial roads and expressways employment districts with most of the region's jobs and ethnically diverse suburbs where English is a minority language About half the population is foreign born the highest proportion in the developed world Population growth because of immigration almost three million in thirty years shows few signs of abating but recently implemented regional strategies aim to contain future urban expansion within a greenbelt and to accommodate growth by increasing densities in designated urban centers served by public transit Toronto Transformations in a City and Its Region traces the city's development from a British colonial outpost established in 1793 to the multicultural polycentric metropolitan region of today Though the original grid survey and much of the streetcar city created a century ago have endured they have been supplemented by remarkable changes over the past fifty years in the context of economic and social globalization Geographer Edward Relph's broad stroke portrait of the urban region draws on the ideas of two renowned Torontonians Jane Jacobs and Marshall McLuhan to provide an interpretation of how its current forms and landscapes came to be as they are the values they embody and how they may change once again

The Great American Transit Disaster Nicholas Dagen Bloom, 2024-05-31 A potent re-examination of America's history of public disinvestment in mass transit An extensively researched and expertly argued exploration of the demise of urban public transit in the United States Layered and multifaceted Pacific Historical Review Many a scholar and policy analyst has lamented American dependence on cars and the corresponding lack of federal investment in public transportation throughout the latter decades of the twentieth century But as Nicholas Dagen Bloom shows in *The Great American Transit Disaster* our transit networks are so bad for a very simple

reason we wanted it this way Focusing on Baltimore Atlanta Chicago Detroit Boston and San Francisco Bloom provides overwhelming evidence that transit disinvestment was a choice rather than destiny He pinpoints three major factors that led to the decline of public transit in the United States municipal austerity policies that denied most transit agencies the funding to sustain high quality service the encouragement of auto centric planning and white flight from dense city centers to far flung suburbs As Bloom makes clear these local public policy decisions were not the product of a nefarious auto industry or any other grand conspiracy all were widely supported by voters who effectively shut out options for transit friendly futures With this book Bloom seeks not only to dispel our accepted transit myths but hopefully to lay new tracks for today s conversations about public transportation funding In this excellent socioeconomic history Bloom offers a comprehensive and thought provoking account of the rise and fall of U S mass transit skillfully assessing successes and stumbles so that we may learn from them and correct course Booklist A powerful introduction for urban scholars practitioners and students interested in American public transit policy Journal of Urban Affairs The book s greatest strength is its hard look at how racism helped ruin U S transit Newcity

Landscape and Power in Geographical Space as a Social-Aesthetic Construct Olaf Kühne, 2018-02-13 This book examines the power definiteness of landscape from a social constructivist perspective with a particular focus on the importance of aesthetic concepts of landscape in development It seeks to answer the question of how societal notions of landscape emerge how they are individually updated and how these ideas affect the use and design of physical space It also analyzes how physical manifestations of societal activity impact on understandings of individual and societal landscapes and addresses the essential aspect of the social construction of landscape cultural specificity which in turn is discussed in the context of the expansion of a western landscape concept The book offers an unprecedented comprehensive and detailed examination of societal power relations in the context of landscape development The numerous case studies from the physical manifestation of modern spatial planning in the United States the power discourses concerning the design of model railway landscapes and the medial production of stereotypical landscape notions shed light on the complex and multilayered interactions of collective and individual landscape references It is a valuable resource for geographers sociologists landscape architects landscape planners and philosophers
