**Elites, Masses, and the Struggle for Democracy in Mexico** Sara Schatz, 2000-05-30 In this book a new general model of delayed transitions to democracy is proposed and used to analyze Mexico's transition to democracy This model attempts to explain the slow gradual dynamics of change characteristic of delayed transitions to democracy and is developed in a way that makes it generalizable to other regional contexts Utilizing both qualitative and quantitative data based on an original data set of forty thousand individual interviews Schatz analyzes how the historical authoritarian corporate shaping of interests and forms of political consciousness has fractured the social base of the democratic opposition and inhibited democratizing social action Using comparative cases of delayed transitions to democracy the author's conclusions challenge and improve upon current theories of democratization In elaborating a model for the delayed transition to democracy the author argues that the emphasis on transformative industrialism in both political modernization and class analytic theories of social bases of democratization is modeled too closely on the western European process of democratization to allow a full explanation of the case of Mexico's transition to democracy In addition she argues that a delayed transitions model provides a more adequate explanation of gradual transitions to democracy because such a model builds on the insights of structural theories regarding the social bases of anti authoritarian mobilization To support the delayed transitions model Schatz compares Mexico with Taiwan and Tanzania countries also characterized by delayed transitions to democracy in the late twentieth century This important book fills a considerable gap in the literature on democratization at the end of the century

Handbook of Regional Conflict Resolution Initiatives in the Global South Jeronimo Delgado-Cacedo, 2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People s Republic of China India Brazil or South Africa in the decision making process in today s world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country s involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this

approach using the perspective of academics and practitioners from countries of the Global South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives *Emerging Powers and the UN* Thomas Weiss, Adriana Abdenur, 2018-11-08 The post 2015 goals and the changing environment of development cooperation will demand a renewed and strengthened UN development system In line with their increasing significance as economic powers a growing number of emerging nations will play an expanded role in the UN development system These roles will take the form of growing financial contributions to individual organizations greater weight in governance structures higher staff representation a stronger voice in development deliberations and a greater overall influence on the UN development agenda *Emerging Powers and the UN* explores in depth the relationship of these countries with and their role in the future UN development system Formally the relationship is through representation as member states first UN and UN staff second UN However the importance of the non public sector interests third UN of emerging economies is also growing through private sponsorship and NGO activities in development This book was originally published as a special issue of Third World Quarterly **Emerging Powers in Global**

**Governance** Andrew F. Cooper, Agata Antkiewicz, 2008-10-17 The early twenty first century has seen the beginning of a considerable shift in the global balance of power Major international governance challenges can no longer be addressed without the ongoing co operation of the large countries of the global South Brazil Russia India China South Africa ASEAN states and Mexico wield great influence in the macro economic foundations upon which rest the global political economy and institutional architecture It remains to be seen how the size of the emerging powers translates into the ability to shape the international system to their own will In this book leading international relations experts examine the positions and roles of key emerging countries in the potential transformation of the G8 and the prospects for their deeper engagement in international governance The essays consider a number of overlapping perspectives on the G8 Heiligendamm Process a co operation agreement that originated from the 2007 summit and offer an in depth look at the challenges and promises presented by the rise of the emerging powers Co published with the Centre for International Governance Innovation
