Mutter, 1988 The power and potential of current ITS technology is described here by the designers and builders of major ITS projects The book illustrates how in less than a decade the field of Intelligent Tutoring Systems has advanced from experimental systems in universities to systems that perform practical real world tasks Intelligent Tutoring Systems Lessons Learned provides a first hand detailed account of how these systems were designed and built out of state of the art technology The essays build on the basic research foundations of the field and define the abilities and limitations of current knowledge With this critical volume teachers and

industrial trainers have a realistic view of the future of their professions and students researchers and professionals in AI education cognitive science and psychology have both an introduction to the field and a comprehensive reference

Advances in Intelligent Tutoring Systems Roger Nkambou, Riichiro Mizoguchi, Jacqueline Bourdeau, 2010-08-27 May the Forcing Functions be with You The Stimulating World of AIED and ITS Research It is my pleasure to write the foreword for *Advances in Intelligent Tutoring Systems* This collection with contributions from leading researchers in the field of artificial intelligence in education AIED constitutes an overview of the many challenging research problems that must be solved in order to build a truly intelligent tutoring system ITS The book not only describes some of the approaches and techniques that have been explored to meet these challenges but also some of the systems that have actually been built and deployed in this effort As discussed in the Introduction Chapter 1 the terms AIED and ITS are often used interchangeably and there is a large overlap in the researchers devoted to exploring this common field In this foreword I will use the term AIED to refer to the search area and the term ITS to refer to the particular kind of system that AIED researchers build It has often been said that AIED is AI complete in that to produce a tutoring system as sophisticated and effective as a human tutor requires solving the entire gamut of artificial intelligence research AI problems

Intelligent Tutoring Systems D. Sleeman, J. S. Brown, 1982 The first volume to appear on this topic and now a classic in the field *Intelligent Tutoring Systems* provides the reader with descriptions of the major systems implemented before 1981 The introduction seeks to emphasise the principal contributions made in the field to outline continuing research issues and to relate these to research activities in artificial intelligence and cognitive science Subject areas discussed are as varied as arithmetic algebra electronics and medicine together with some informal gaming environments

Artificial Intelligence and Intelligent Tutoring Systems Danny Kopec, R. Brent Thompson, 1992 This book is divided into three parts machine learning and problem solving machine teaching and Real world applications Each of these areas is in some sense critical to the present and future credibility of AI as a discipline
