Mi Primer Libro De Ciencias Science School:

Enseñanza y aprendizaje de las ciencias Wynne Harlen, 1989 Esta nueva edición revisada y puesta al día da cuenta de los profundos cambios habidos en la enseñanza de las ciencias en la educación primaria Con un sólido fundamento teórico Wynne HARLEN presenta una perspectiva práctica para facilitar la enseñanza de las ciencias basada en la convicción de que las decisiones curriculares deben fundarse en una visión coherente de la naturaleza del aprendizaje que se pretende En esta revisión la autora ha prestado atención al desarrollo de las ideas científicas del alumnado y a la función de las destrezas procedimientos y actitudes en el aprendizaje significativo Con un estilo de divulgación muy accesible y al mismo tiempo riguroso HARLEN incorpora numerosos ejemplos de actividades prácticas sobre la forma en que el profesorado puede estimular a niños y niñas a comunicar sus propias ideas previas y sobre cómo confrontarlas con otras experiencias para facilitar procesos de aprendizaje Dos nuevos capítulos se ocupan de los aspectos teóricos y prácticos de la evaluación de la enseñanza de las ciencias así como del desarrollo de los registros correspondientes para facilitar una evaluación formativa Estamos ante una edición completamente actualizada que constituye un recurso esencial y muy práctico para el profesorado de ciencias y para quienes trabajan en el ámbito de su formación y actualización

History of Science in Latin America: The Construction of an Intellectual Field (20th century) María de la Paz Ramos-Lara, Luis Carlos Arboleda, 2024-12-23 This book provides a unique analysis of how the History of Science became institutionalized in Latin America during the last two decades of the 20th century It examines the establishment of the first Latin American community in the History of Science and its connections with the international community and various international institutions such as the International Union of History and Philosophy of Science and Technology Division of History of Science and Technology IUHPST DHST The authors are the same scholars who have been involved in several activities and strategies to professionalize and institutionalize this field in Latin America They explore the impact of Western educational institutions and theoretical and methodological perspectives on the introduction of the History of Science in several Latin American nations The book examines the two way movement of European scholars to Latin America and Latin American students mainly to France At that time the organization of congresses in France Spain the United States and other European countries encouraged the participation of Latin American historians of science Notable events include the Science and Empires congress in Paris 1990 the Ciencia descubrimiento y mundo colonial conference in Madrid 1991 and the International Congresses of History of Science and Technology ICHST The authors refer to seven Latin Americans who signed the Declaration of Bucharest 1981 to promote the history of sciences in their countries This initiative led to the establishment of the Latin American Society for the History of Science and Technology LASHST in 1982 under the leadership of Juan José Saldaña director of Quipu and Cuadernos de Quipu With his leadership existing national societies were reactivated and new ones were created up to ten in four years Argentina Brazil Colombia Mexico Chile Peru Venezuela Costa Rica Ecuador and Cuba This effort internationally legitimized Latin

American scientific practice culminating in celebrating the XXI ICHST in Mexico City in 2001 He founded the International Association for Scientific Cultural Diversity IASCUD and became the first Latin American to serve as Secretary General of IUHPST DHS from 2001 to 2005 Through his various actions and activities Salda a and the LASHST community were able to promote the institutionalization of the History of Science in Latin America This book pays a well deserved tribute to his efforts

Science and Catholicism in Argentina (1750-1960) Miguel de Asúa,2022-05-09 Science and Catholicism in Argentina 1750 1960 is the first comprehensive study on the relationship between science and religion in a Spanish speaking country with a Catholic majority and a Latin pattern of secularisation The text takes the reader from Jesuit missionary science in colonial times through the conflict ridden 19th century to the Catholic revival of the 1930s in Argentina The diverse interactions between science and religion revealed in this analysis can be organised in terms of their dynamic of secularisation The indissoluble identification of science and the secular which operated at rhetorical and institutional levels among the liberal elite and the socialists in the 19th century lost part of its force with the emergence of Catholic scientists in the course of the 20th century In agreement with current views that deny science the role as the driving force of secularisation this historical study concludes that it was the process of secularisation that shaped the interplay between religion and science not the other way around

Standing between Life and Extinction David L. Propst,Jack E. Williams,Kevin R. Bestgen,Christopher W.

Hoagstrom,2021-02-15 North American deserts lands of little water have long been home to a surprising diversity of aquatic life from fish to insects and mollusks With European settlement however water extraction resource exploitation and invasive species set many of these native aquatic species on downward spirals In this book conservationists dedicated to these creatures document the history of their work the techniques and philosophies that inform it and the challenges and opportunities of the future A precursor to this book Battle Against Extinction laid out the scope of the problem and related conservation activities through the late 1980s Since then many nascent conservation programs have matured and researchers have developed new technologies improved and refined methods and greatly expanded our knowledge of the myriad influences on the ecology and dynamics of these species Standing between Life and Extinction brings the story up to date While the future for some species is more secure than thirty years ago others are less fortunate Calling attention not only to iconic species like the razorback sucker Gila trout and Devils Hole pupfish but also to other fishes and obscure and fascinating invertebrates inhabiting intermittent aquatic habitats this book explores the scientific social and political challenges of preserving these aquatic species and their habitats amid an increasingly charged political discourse and in desert regions characterized by a growing human population and rapidly changing climate

Climate Change and Human Responses Gregory Monks,2017-03-21 This book contributes to the current discussion on climate change by presenting selected studies on the ways in which past human groups responded to climatic and environmental change In particular the chapters show how these responses are seen in the animal remains that people left behind in their occupation sites Many of these bones represent food remains so the environments in which these animals lived can be identified and human use of those environments can be understood In the case of climatic change resulting in environmental change these animal remains can indicate that a change has occurred in climate environment and human adaptation and can also indicate the specific details of those changes **Stanford University Publications** ,1923 **Bibliograf a espa ola** ,2000
