Missouri's three main habitat types are wetlands, cities, and the Mark Twain Forest National Park. As a result, this state is home to a large variety of wading and aquatic birds. The woodlands are home to numerous hawk and owl species, as well as lovely songbirds. Some birds have made a successful transition to city life. Many migratory animals stop in Missouri for a quick lunch or an extended stay to give birth. Here are a few examples of the regional variety. Birds of Missouri Greg Homel, R., 2015-07-15. The Birds of Missouri is a quick and easy to use, light weight, durable, all weather fieldguide to the inspiring and incredibly varied birdlife inhabiting the State of Missouri. Stunning digital photographs depict more than 125 species of common and notable birds, enabling users to identify nearly every bird they encounter day or night within the guide's extensive area of coverage. Whether backyard birding or seeking waterfowl, forest birds, Bald Eagles, and neotropical migrants along the mighty Mississippi river and its floodplain, embarking on a serious birding trip to top hotspots, to set your sites on the colorful variety of warblers, orioles, grosbeaks, and buntings that migrate through or nest in the region, identifying your garden birds, or on a quick business trip to Kansas City, St. Louis, Jefferson City, and points between, you'll be glad to have this booklet. Designed to satisfy the needs of birders of all interest levels, but especially beginning and intermediate users trying to make sense of it all, this beautiful and amazingly informative six fold guide will be an indispensable field companion on all outings. This affordable guide will serve as a lasting memento of any trip and will conveniently fit into a daypack pocket or glove compartment, facilitating easy field identification, whether in a Springfield garden, on a family vacation, or a serious birding trip visiting all the best birding hot spots within The Show Me State.

**Missouri Bird Watching** Bill Thompson, III, 2005-03-29. Bird watching is a regional hobby, and the birds that frequent the backyards of Missouri differ from the birds found in Michigan. This series targets beginning and intermediate bird watchers from each Midwestern state. The books are state specific and highlight the birds that are found in each state. In addition to the profile, each bird entry includes a map to identify the specific range covered by the bird. Full color seasonal section informs the reader of the migrating birds that can be seen that month, the foods that attract those birds, and the plants that can assist in attracting birds.
