Model Shipwright 128 John Bowen, Jr., 2005-02 This quarterly journal since its launch in 1972 has been regarded as the world's leading ship modelling publication. The mixture of articles, reviews, news and comment from modelmakers world wide provides the best and most detailed information available anywhere and is enhanced with authentic plans, clear diagrams and many photographs. Although the miniature ships are the most important feature of the journal, with articles explaining how individual models were researched and constructed, the other aspects of model making have not been forgotten: dioramas, modelling techniques, tools and recent events are all covered. Each issue of the journal comes complete with a free large scale modeller's draught with accompanying modelling notes, illustrations and specifications for a featured vessel. **The Master Shipwright's Secrets** Richard Endor, 2020-03-05 AWARDED THE ANDERSON MEDAL 2020 This splendid book will appeal to maritime historians, archaeologists, model makers and nautical enthusiasts across the board. Colin Martin, The Nautical Archaeology Society. A remarkable piece of work. J. D. Davies, Historian and Author. Inspired by the recent discovery of mathematically calculated digital plans for a fourth rate ship by the Deptford master shipwright John Shish, *The Master Shipwright's Secrets* is an illustrated history of Restoration shipbuilding focused on the *Tyger*, one of the smaller but powerful two deck warships of the period. It examines the proceedings of King Charles II in deciding the types of ship he wanted and his relationship with his master shipwrights. This fascinating book reveals the many secrets of Charles II's shipwrights through an analysis of John Shish's plans for the *Tyger*, revealing innovative practical calculations which differ significantly from the few contemporary treatises on the subject and the complicated process of constructing the moulds necessary to make the ship's frame. All the other duties performed by the master shipwrights such as repairing ships, controlling their men and keeping up with the latest inventions are also discussed in detail. *The Master Shipwright's Secrets* is replete with beautiful and detailed illustrations of the construction of the *Tyger* and explores both its complicated history and its complex rebuilding, complete with deck plans, internal sections and large scale external shaded drawings. The title also explores associated ships including another fourth rate ship, the *Mordaunt*, which was purchased into the Navy at the time and underwent a dimensional survey by John Shish. A rare contemporary section drawing of another fourth rate English ship and constructional drawings of Shish's later fourth rate ship *St Albans* are also included. **Ship Modeling from Stem to Stern** Milton Roth, 1988-02-22 Introduces useful tools and techniques, discusses kits, plans and work areas and covers painting, glues, hull construction, decks, masts, rigging, fittings, sails and metal parts. *Nautical Research Journal*, 2002. *Index and introductory. Museum,1865 **Official Descriptive and Illustrated Catalogue of the Great Exhibition of the Works of Industry of All Nations, 1851** ,1851 The Ship of the Line Brian Lavery,2015-01-14 The National Maritime Museum in Greenwich houses the largest collection of scale ship models in the world many of which are official contemporary artefacts made by the craftsmen of the navy or the shipbuilders themselves and ranging from the mid seventeenth century to the present day As such they represent a three dimensional archive of unique importance and authority Treated as historical evidence they offer more detail than even the best plans and demonstrate exactly what the ships looked like in a way that even the finest marine painter could not achieve The Ship of the Line is the second of a new series that takes selections of the best models to tell the story of specific ship types in this case the evolution of the ship of the line the capital ship of its day and the epitome of British seapower during its heyday from 1650 1850 This period too coincided with the golden age of ship modelling Each volume depicts a wide range of models all shown in full colour including many close up and detail views These are captioned in depth but many are also annotated to focus attention on interesting or unusual features and the book weaves the pictures into an authoritative text producing a unique form of technical history The series is of particular interest to ship modellers but all those with an enthusiasm for the ship design and development in the sailing era will attracted to the in depth analysis of these beautifully presented books **The American Clipper Ship, 1845-1920** Glenn A. Knoblock,2014-01-29 This work offers a new and comprehensive account of the fastest and most beautiful sailing ships ever built It explores the quest for speed on the seas from the early 1800s through the fast paced times of the 1850s spurred on by the California Gold Rush of 1849 Not only are the career details of such noted ships as the Flying Cloud and Challenge discussed in detail but they are also put in context with the times in which they operated Their builders in East Coast states from Maine to Florida are discussed in detail as are the men and a woman in one instance who commanded and manned these ships The book documents the roles that owners and shipping agents played what kinds of cargo the ships carried worldwide and the unusual trades in which they participated **The Way of a Ship in the Midst of the Sea** David K. Brown,2006 William Froude revolutionised ship design and performance by developing the first tank testing methods and formulating theories on roll frictional resistance propeller performance and more This book presents the life and career of this brilliant man The Shipwright's Trade Sir Westcott Abell, **Library of Congress Catalogs** Library of Congress,1978 **British Books in Print** ,1985 **Once a Week** S. Lucas,1865 **Reconstructing a Maritime Past** Matthew Harpster,2022-12-30 Reconstructing a Maritime Past argues that rather than applying geo ethnic labels to shipwrecks to describe Greek or Roman seafaring a more intriguing alternative emphasizes a maritime culture s valorization of the Mediterranean Sea Doing so creates new questions and research agendas to understand the past human relationship with the sea This study makes this argument in three sections Chapters 1 and 2 contrasting intellectual histories of maritime archaeological interpretive approaches common in Northern Europe and the Mediterranean propose that the former perspective which embodies

contemporary and fluid perceptions of culture is a better theoretical framework for future research Chapters 3 5 re interpret the corpus of submerged sites in the Mediterranean Sea with this approach arguing that this dataset does not represent Phoenician Muslim or Byzantine seafaring but the practices of a maritime culture Key to this section is the author s method that utilizes superimposed polygons to model patterns of maritime activity generating centennial results at different scales Having built the models of a maritime culture s valorization of the Mediterranean Sea Chapter 6 contains the first comparisons of these models to other datasets questioning the relevance of textual media to understand maritime activity while finding closer analogues with other archaeological corpora By deconstructing interpretive methods in maritime archaeology offering a new synthesizing interpretive approach that is scalable and decoupled from past perceptions and critically examining the applicability of various media to illuminate the past maritime experience this book will appeal to scholars at various stages of their careers
