**The Master Shipwright's Secrets** Richard Endor,2020-03-05 AWARD THE ANDERSON MEDAL 2020 This splendid book will appeal to maritime historians archaeologists model makers and nautical enthusiasts across the board Colin Martin The Nautical Archaeology Society A remarkable piece of work J D Davies Historian and Author Inspired by the recent discovery of mathematically calculated digital plans for a fourth rate ship by the Deptford master shipwright John Shish The Master Shipwright s Secrets is an illustrated history of Restoration shipbuilding focused on the Tyger one of the smaller but powerful two deck warships of the period It examines the proceedings of King Charles II in deciding the types of ship he wanted and his relationship with his master shipwrights This fascinating book reveals the many secrets of Charles II s shipwrights through an analysis of John Shish s plans for the Tyger revealing innovative practical calculations which differ significantly from the few contemporary

treatises on the subject and the complicated process of constructing the moulds necessary to make the ship's frame. All the other duties performed by the master shipwrights such as repairing ships, controlling their men and keeping up with the latest inventions are also discussed in detail. *The Master Shipwright's Secrets* is replete with beautiful and detailed illustrations of the construction of the *Tyger* and explores both its complicated history and its complex rebuilding, complete with deck plans, internal sections and large scale external shaded drawings. The title also explores associated ships including another fourth rate ship the *Mordaunt* which was purchased into the Navy at the time and underwent a dimensional survey by John Shish. A rare contemporary section drawing of another fourth rate English ship and constructional drawings of Shish's later fourth rate ship *St Albans* are also included. *Ship Modeling from Stem to Stern* Milton Roth, 1988-02-22 From a well known model builder here are hints, tips and techniques. Roth covers the history of ships and model ship building, discusses plans, sizes, conversions and methods of construction. For ship modelers who want to improve the details and appearance of their models. **Rigging: Period Fore-and-Aft Craft** Lennarth Petersson, 2015-01-30 A very useful little reference book for members who strive to achieve an accurate set of rigging lines on their models. *Bottle Ships* Employing superb clear draftsmanship, this book illustrates each and every detail of the rigging of typical period fore and aft vessels. The rigging of period ship models is arguably the most complex task that any modeler has to accomplish; the intricacies can be daunting and visual references limited. The author's first book *Rigging Period Ship Models* was a triumph of clarity for those needing to decipher the complexities of square rig and has now sold in multiple editions. This book does the same for fore and aft craft and deploys three typical eighteenth century types: an English cutter, a three masted French lugger and an American schooner. Some 200 diagrams show clearly where each separate item of standing and running rigging is fitted, led and belayed. Whatever the requirements of the modelmaker, all the information is here. This edition brings a visual clarity to the complexities of period rigging and will delight anyone with an interest in the rigging of traditional fore and aft craft. This book is naturally highly commended to its target audience but anyone with an interest in sailing ships will find it an interesting source of information that can be very hard to find. *Firetrench* Not just for modelers but also a boon to traditional seafarers and readers of historical fiction. Julian Stockwin, author of *To the Eastern Seas*. **Thunderer** William Mowll, 2010-04-06 The expert ship modeler's step by step guide to building a large scale model of the dreadnaught that fought in the WWI Battle of Jutland. Laid down in April of 1910, HMS *Thunderer* was the last Orion class dreadnaught battleship built for the Royal Navy. The author's 1:96 scale museum quality model of this ship brings to life the power and potency of the Super Dreadnaughts. In this comprehensive guide, every aspect of model building is covered from the hull to wireless equipment. All the different techniques required to bring a complex model battleship to completion are thoroughly explained, including casting in metal and GRP, silver brazing, soft soldering, metal fabrication in steel, brass, copper, aluminum and pewter, and lathe turning and milling operations for the production of guns and propellers. The author also covers the contemporary American

battleship USS Texas the only remaining ship of that type and era and an inspiration for any modeler setting out to tackle this subject Not just a how to manual the book is also an eloquent testimony to the skills of the designers and the original builders as well as a wonderful evocation of the great ships that fought at the Battle of Jutland     *Model Shipwright* Bowen J Staff,MODEL SHIPWRIGHT (Periodical.),1974-09     **The shipwright's vade-mecum [by D.
