Modèles mathématiques pour la stimulation inventive Arnold Kaufmann, 1979-01-01 T00:00:00+01:00 La créativité un don rencontré chez quelques hommes mais aussi une faculté essentielle de notre espèce C'est par une association permanente de la logique et de l'imagination que nous sommes devenus ce que nous sommes en bien et peut-être aussi en mal Toutefois la société du passé était un milieu où les interactions entre les êtres et les choses étaient assez lentes rares et faibles Cette société est aujourd'hui un système où ces interactions sont rapides multiples fortes et contraignantes Pour survivre ou tout simplement vivre dans une compétition permanente la créativité associe la volonté d'entreprendre et la persévérance est tous les niveaux une nécessité Mais peut-on améliorer la créativité Peut-on rendre créatifs ceux qui ne le sont pas ou plutôt qui le sont très faiblement Car au fond nous sommes tous créatifs des degrés divers et dans des domaines particuliers l'imagination n'est-elle pas la boîte à or où sort notre liberté de penser et d'agir Il existe depuis des années des méthodes destinées à stimuler l'imagination et à développer la créativité Mais il est possible d'aller plus loin maintenant que nous disposons de mathématiques appropriées et d'ordinateurs On peut désormais utiliser des méthodes de stimulation inventive fondées sur des modèles mathématiques Voici ce que ce livre le premier qui ait traité sur ce sujet nous démontre Son auteur Arnold Kaufmann ingénieur et mathématicien parmi les plus connus et qui a une longue expérience internationale dans l'enseignement scientifique et la direction de groupes de recherche présente le résultat de ses plus récents travaux Il s'agit de la construction de modèles mathématiques créant des stimuli efficaces pour explorer des domaines nouveaux de la pensée et leurs applications possibles Toute personne quelle que soit sa discipline littéraire ou scientifique peut lire et utiliser cet ouvrage réellement innovateur Bien que reposant sur des concepts mathématiques rigoureux les modèles présentés sont la porte de tous Pas de formules compliquées ni de raisonnements trop difficiles la présentation des modèles est fondée sur des tableaux et des figures Et il sera très facile de les utiliser tous ont expérimenté pratiquement Ce nouveau livre d'Arnold Kaufmann constitue une tape décisive dans la diffusion des méthodes et des modèles destinés à développer les facultés d'innovation de l'individu ou du groupe

**Elements for a Theory of Decision in Uncertainty** Jaime Gil-Aluja, 2013-03-09 Decisions in uncertainty Scientific reaction to change During latter decades the basic elements that have traditionally made up the society in which economic activity develops have been submitted to the effect of multiple aggressions as a consequence of the outcome of events motivated by the nature itself of the human being always seeking a level of happiness that is never reached In a very brief manner we are accustomed to mention these by using words such as revolution profound changes convulsions the results of which are manifest through non linear reactions that lead to a future charged with uncertainty To get to know explain and treat this new world constitutes one of the many objectives of those who desire a society in the service of man and for those who aspire to the fact of the concept of mutuality transcending the use less limits of the printed word But for this it will be necessary to overcome a whole realm of obstacles placed in the way by those comfortably embedded in old principles decrepit ideas and are not

willing to open the windows of their mind to receive the fresh air of a new era

7 **New Operational Approaches for Financial Modelling** Constantin Zopounidis, 2012-12-06

This book is devoted to the 19 Meeting of the EURO Working Group on Financial Modelling held in Chania Crete Greece November 28 30 1996. The EURO Working Group on Financial Modelling was founded in September 1986 in Lisbon. The primary field of interest for the Working Group can be described as the development of financial models that help to solve problems faced by financial managers in the firm. From this point of view the following objectives of the Working Group are distinguished: providing an international forum for exchange of information and experience on financial modelling; encouraging research in financial modelling; i.e. new techniques methodologies software empirical studies etc; stimulating and strengthening the interaction between financial economic theory and the practice of financial decision making; cooperating and exchanging information with universities and financial institutions throughout Europe. According to the above objectives the basic aim of this book is to present some new operational approaches i.e. neural nets multicriteria analysis new optimization algorithms decision

software etc for financial modelling both in a theoretical and practical levels Thus the present volume is divided in nine chapters The first chapter refers to the new trends in financial modelling and includes two invited papers by Gil Aluja and Pardalos The second chapter involves papers on the topic of high performance computing and finance which is a European union project in which participate some members of the EURO Working Group on Financial Modelling Spronk Zenios Dempster etc
