Nurses Principles of Care is an essential guide for nursing students and newly qualified nurses. It provides a concise introduction to the essential principles of nursing care. It encourages nurses to examine the principles and evidence underlying nursing practice and equips them with a thorough understanding of the complexities of patient care in different environments of care. Principles of Care explores concepts of health and illness, conceptual frameworks for practice, principles of healthcare delivery and professional standards. Key themes include assessment and planning, implementation and evaluation, patient education and health promotion, decision making and risk management, benchmarking clinical effectiveness and practice development. Examines assessment, planning and evaluation of care. Covers risk management and prioritisation of care. Addresses the use of NICE guidance and National service frameworks. Explores clinical effectiveness, practice development and quality assurance. Includes learning objectives, scenarios and case studies.

Rehabilitation of the Older Person Amanda J. Squires, Margaret B. Hastings, 2002. Readers will be able to gain knowledge of how to manage older people with difficult conditions and in different environments. Much of the work of the professionals in this area has changed as a result of NHS reforms, new practices and patient demands.

Principles of Professional Studies in Nursing Janice Brown, Paula Libberton, 2017-09-16. Principles of Professional Studies in Nursing supports readers as they work towards becoming professional nurses. Interactive and student centred with case studies and learning activities, exercises throughout this text enables students to discuss, debate and develop their understanding and practice for the delivery of client centred care.

Contemporary Issues in Coronary Care Nursing Fiona Timmins, 2005-08-15. In this text Fiona Timmins integrates the findings of recent nursing research with key aspects of the nurse's role. She provides an evidence based rationale for the best ways of improving cardiac care in general and for specific conditions, describes important nursing initiatives to reduce the risk factors and presents a needs based approach to patient education. Concerned with the need to bridge the current research practice gap in coronary care, she knows how nurses can make the best use of available research and describes the advances that are being made in nurse led services in this area. Contemporary Issues in Coronary Care Nursing offers a non medical approach to coronary care and is informed throughout by the latest nursing theory and research.
