Evans, Vimla L. Patel, 2013-06-29 Cognitive science is a multidisciplinary science concerned with understanding and utilizing models of cognition It has spawned a great deal of research on applications such as expert systems and intelligent tutoring systems and has interacted closely with psychological research However it is generally accepted that it is difficult to apply cognitive scientific models to medical training and practice This book is based on a NATO Advanced Research Workshop held in Italy in 1991 the purpose of which was to examine the impact of models of cognition on medical training and practice and to outline future research programmes relating cognition and education and in particular to consider the potential impact of cognitive science on medical training and practice A major discovery presented in the book is that the research areas related to artificial intelligence cognitive psychology and medical decision making are considerably closer both conceptually and theoretically than many of the workshop participants originally thought      *Demystifying and Preparing for Advanced Practice - E-Book* Jonathan Thomas, Melanie Rogers, Angela Banks, Anna Jones, Colette Henderson, 2025-05-22 With advanced practice set to transform health service delivery *Demystifying and Preparing for Advanced Practice* is the first comprehensive resource that covers all the requirements of the advanced practice qualification across all health professions and in all settings Written by expert authors from across the UK the book explores the four central pillars under which Advanced Practitioners are required to operate clinical practice leadership and management education and research It will help the reader understand their role prepare for and pass their assessments and go on to practise autonomously This book is an indispensable guide for all those undertaking their Master's qualification and is ideal for both aspiring and student Advanced Practitioners Suitable for all healthcare professionals seeking to attain advanced practice status Covers the core content of the MSc qualification Takes a four nations approach with expert contributions from highly experienced academics clinicians supervisors and students from across the UK Provides a roadmap for people wishing to pursue an advanced practice career Covers required concepts and educations in detail Includes a dedicated chapter written by and for students Explores the international approach to advanced practice      *From Is to Ought: The Place of Normative Models in the Study of Human Thought* Shira Elqayam, David E. Over, 2016-08-12 In the study of human thinking two main research questions can be asked Descriptive Q What is human thinking like Normative Q What ought human thinking be like For decades these two questions have dominated the field and the relationship between them generated many a controversy Empirical normativist approaches regard the answers to these questions as positively correlated in essence human thinking is what it ought to be although what counts as the ought standard is moot In contemporary theories of reasoning and decision making this is often

associated with a Panglossian framework an adaptationist approach which regards human thinking as a priori rational In contrast prescriptive normativism sees the answers to these two questions as negatively correlated Normative models are still relevant to human thought but human behaviour deviates from them quite markedly with the invited conclusion that humans are often irrational Prescriptive normativism often results in a Meliorist agenda which sees rationality as amenable to education Both empirical and prescriptive normativism can be contrasted with a descriptivist framework for psychology of human thinking Following Hume's strict divide between the is and the ought descriptivism regards the descriptive and normative research questions as uncorrelated or dissociated with only the former question suitable for psychological study of human behaviour This basic division carries over to the relation between normative ought rationality based on conforming to normative standards and instrumental rationality based on achieving one's goals Descriptivist approaches regard the two as dissociated whereas normativist approaches tend to see them as closely linked with normative arguments defining and justifying instrumental rationality This research topic brings together diverse contributions to the continuing debate Featuring contributions from leading researchers in the field the e book covers a wide range of subjects arranged by six sections The standard picture Normativist perspectives In defence of soft normativism Exploring normative models Descriptivist perspectives Evolutionary and ecological accounts Empirical reports With a total of some 24 articles from 55 authors this comprehensive treatment includes theoretical analyses meta theoretical critiques commentaries and a range of empirical reports The contents of the Research Topic should appeal to psychologists linguists philosophers and cognitive scientists with research interests in a wide range of domains from language through reasoning judgment and decision making and moral judgment to epistemology and theory of mind philosophical logic and meta ethics

*Judgment and Decision Making* David Hardman, 2009-02-09 *Judgment and Decision Making* is a refreshingly accessible text that explores the wide variety of ways people make judgments It examines assessments of probability frequency and causation as well as how decisions are rendered under conditions of risk and uncertainty Topics covered include dynamic everyday and group decision making individual differences and the nature of mind and brain in relation to judgment and decision making Offering up to date theoretical coverage including perspectives from evolutionary psychology and neuroscience this volume has everything a psychology student needs for BPS accreditation whilst drawing out the practical applications for non psychology students with plentiful examples from business economics sport law and medicine The latest addition to the BPS Textbooks in Psychology series this thorough text provides a succinct reader friendly account of the field of judgment and decision making
