Modern Architect:

Modern Architecture Otto Wagner, 1898 In 1896 Otto Wagner's *Modern Architecture* shocked the European architectural community with its impassioned plea for an end to eclecticism and for a modern style suited to contemporary needs and ideals utilizing the nascent constructional technologies and materials Through the combined forces of his polemical pedagogical and professional efforts this determined newly appointed professor at the Vienna Academy of Fine Arts emerged in the late 1890s along with such contemporaries as Charles Rennie Mackintosh in Glasgow and Louis Sullivan in Chicago as one of the leaders of the revolution soon to be identified as the Modern Movement Wagner's historic manifesto is now presented in a new English translation the first in almost ninety years based on the expanded 1902 text and noting emendations made to the 1896 1898 and 1914 editions In his introduction Dr Harry Mallgrave examines Wagner's tract against the backdrop of nineteenth century theory critically exploring the affinities of Wagner's revolutionary plan with the German eclectic debate of the 1840s the materialistic tendencies of the 1870s and 1880s and the emerging cultural ideology of modernity *Modern Architecture* is one of those rare works in the literature of architecture that not only proclaimed the dawning of a new era but also perspicaciously and cogently shaped the issues and the course of its development it defined less the personal aspirations of one individual and more the collective hopes and dreams of a generation facing the sanguine promise of a new century

Transformations in Modern Architecture Arthur Drexler, 1979 [Making it Modern](#) Aaron Betsky, 2016-12-15 At its root modernism is that fundamental It is a question of having something to represent that is of the moment In the most radical interpretation modernism always comes too late The modern is that which is always new which is to say always changing and already old by the time it has appeared Modernism is always a retrospective act one of documenting or trying to catch what has already appeared an attempt to fix life as it is being lived Modernity is just the very fact that we as human beings are continually remaking the world around us through our actions and are doing so consciously Modernism is a monument to or memory of that act which in its own making tries to remake the world it is pretending to represent

The Modern

Architect Edward Shaw, 1855 *Modern Architecture* Alan Colquhoun, 2002-04-25 This new account of international modernism explores the complex motivations behind this revolutionary movement and assesses its triumphs and failures The work of the main architects of the movement such as Frank Lloyd Wright Adolf Loos Le Corbusier and Mies van der Rohe is re examined shedding new light on their roles as acknowledged masters Alan Colquhoun explores the evolution of the movement from Art Nouveau in the 1890s to the megastructures of the 1960s revealing the often contradictory demands of form function social engagement modernity and tradition The Other Tradition of Modern Architecture Colin St. John Wilson, 2007 Sets out to examine the underlying themes of Modern European architecture assessing their impact influence and continuing development This book argues for a continuing tradition an uncompleted project sustained against the rigidifying orthodoxy the white walls functionalism and blank boxes of CIAM by a resistance movement **The Meaning of Modern Architecture** Dr Hans Rudolf Morgenthaler, 2015-09-28 Using empathy as established by the Vienna School of Art History complemented by insights on how the mind processes visual stimuli as demonstrated by late 19th century psychologists and art theorists this book puts forward an innovative interpretative method of decoding the forms and spaces of Modern buildings It proposes that Modern architecture is too diverse to be reduced to a few common formal or ornamental features Instead by relying on the viewer's innate psycho physiological perceptive abilities the sensual and intuitive understandings of composition form and space are emphasized **Richard Neutra and the Search for Modern Architecture** Thomas S. Hines, Richard Joseph Neutra, 1994-01-01 An important contribution to the understanding of modernist culture in the United States and a perceptive analysis of the achievement of a major American architect with a European background and an international reputation William Jordy Brown University This study part biography and part architectural analysis is a modern masterpiece of architectural history The prose is lucid and sometimes elegant very much like the work of Richard Neutra which it so brilliantly examines Peter Gay Yale University An important contribution to the understanding of modernist culture in the United States and a perceptive analysis of the achievement of a major American architect with a European background and an international reputation William Jordy Brown University *Modern Architecture and Other Essays* Vincent Scully, 2003 Combining the modes of historian and critic in unique and compelling ways Scully has profoundly influenced the way architecture is thought about and made This illustrated and elegantly designed volume distills Scully's incalculable contribution 300 illustrations **Ernesto Nathan Rogers** Maurizio Sabini, 2021-02-11 Architect Ernesto Nathan Rogers 1909 1969 was a towering figure in 20th century Italian architecture with a significant impact at the international level Through the work of his collaborative firm BBPR the editorship of publications such as *Domus* and *Casabella* and his teaching at the Politecnico in Milan Rogers ensured a lasting influence on the field as a practitioner theorist and educator However his contributions have been largely neglected by scholarship outside of Italy Published as part of the Bloomsbury Studies in Modern Architecture series

which brings to light the work of significant yet overlooked modernist architects this book re assesses Ernesto Nathan Rogers cultural legacy It is the first comprehensive critical work on Rogers in English and emphasizes Rogers vision for the role of the architect as a public intellectual as well as his commitment to pursue a renewed path of professional and cultural research within the Modern Project The book also discusses Roger s willingness to challenge academic classicized monumentality as well as modernist stereotypes to emerge as a leader of Italian design in the aftermath of World War II his interest in all scales of design and planning with a cross disciplinary mentality tradition in modernity and criticality as a mode of practice to bring a detailed account of the work and thought of Ernesto Nathan Rogers to an English speaking audience for the first time With a foreword by Kenneth Frampton *The Life and Work of Jerzy Soltan* Szymon Ruszczewski,2023-12 This book is the first comprehensive monograph on Polish modern architect Jerzy So tan s work including his designs theory and teachings in Poland and America based on extensive archival research and oral history interviews with former students The Life and Work of Jerzy So tan takes the reader on a journey to both sides of the iron curtain the communist Poland and the capitalist United States contributing to the existing scholarship on modernism in post socialist counties on CIAM and on Team 10 It pictures So tan as a central player in the history of modernism building on his own contribution and on close relationships with Le Corbusier and Team 10 This book illustrates not only So tan s work but also his life and how it influenced 20th century architecture Looking in detail at his designs and texts enables the reader to discover how modern architecture tendencies can fit into a larger geopolitical context and how designs can be true manifestos to an architect s theory The reader will be immersed in a series of different contexts from communist Poland the vibrant academic atmosphere at Harvard to lively discussions on the future of modern architecture This publication will be of particular interest for those studying modern architecture in Central Europe and in post socialist countries in particular in Poland Architects designers architectural and design students and modern architecture enthusiasts will find this publication on the last modernist architect revealing new perspectives thanks to the unpublished and unresearched sources Craft Theory and Contemporary Architecture Grant Alford,2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture Craft is an old and familiar idea but the line between craft and art or craft and mere manufacturing for example is notoriously hard to describe In architecture a similarly blurred line between the design process on the one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today s technological landscape is a complex problem Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice new ways of engaging

other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment Written for students and scholars this book challenges and extends the legacy of craft thinking in architecture Mysticism and Architecture Roger Paden, 2007-01-11

Mysticism and Architecture Wittgenstein and the Palais Stonborough is a multi disciplinary study of the Viennese palais that the philosopher Ludwig Wittgenstein helped design and build for his sister shortly after he abandoned philosophy for more practical activities and during the period that supposedly separates his early from his late philosophy Weaving together discussions of a number of social political and cultural developments that helped to give fin de si cle Vienna its character including the late modernization of Austrian society industry and economy the construction of Vienna s Ringstrasse the slow decay of the Hapsburg monarchy and the failure of Austrian liberalism as well as Tolstoy s religiously based ethical views Adolf Loos s critique of architectural ornament Karl Kraus s analysis of Vienna s decadence Kierkegaard s and Nestroy s views on the importance of indirect communication Otto Weininger s theory of the nature and duty of genius Camillo Sitte and Otto Wagner s dispute over good urban form Schopenhauer s aesthetic theories and his Eastern philosophy of life and Russell and Frege s philosophical and logical theories the book presents a philosophical biography of Wittgenstein reminiscent of but substantially different from Janik and Toulmin s Wittgenstein s Vienna This philosophical biography underpins a new interpretation of the house which argues that the house belongs to neither architectural Modernism nor Postmodernism but is instead caught between those two movements This analysis of the house in turn grounds a new interpretation of Wittgenstein s philosophical works that emphasizes their mystical nature and practical purpose Finally this interpretation shows the unity of these works while simultaneously suggesting an underlying flaw namely that they arise from two fundamentally opposed worldviews present in Vienna during Wittgenstein s youth aesthetic modernism and critical modernism **The Architectural Review** ,1912
