Chinese History Endymion Porter Wilkinson, 2000. Endymion Wilkinson's bestselling manual of Chinese history has long been an indispensable guide to all those interested in the civilization and history of China. In this latest edition, now in a bigger format, its scope has been dramatically enlarged by the addition of one million words of new text. Twelve years in the making, the new manual introduces students to different types of transmitted, excavated, and artifactual sources from prehistory to the twentieth century. It also examines the context in which the sources were produced, preserved, and received; the problems of research and interpretation associated with them; and the best, most up-to-date secondary works. Because the writing of history has always played a central role in Chinese politics and culture, special attention is devoted to the strengths and weaknesses of Chinese historiography.

This resource, the first of its kind written in English, details the microscopic and macroscopic views of the Chinese Civil War: people, events, places, and institutions.

Career Patterns in the Ch'ing Dynasty Raymond Chu, William Saywell, 2020-08-06. The office of governor-general (tsung-tu) was the highest provincial post throughout the Ch'ing dynasty. As such, it was a vital link in the control of a vast empire by a very small and alien ruling elite. This is primarily a biographical and statistical analysis of the incumbents of that office. By analyzing the biographical data of those who held the position of governor-general, much may be learned about the nature of the office itself. However, the main objective of the study is to provide information on career patterns: that is, the variety of different posts held from the first official appointment.

to that of governor general of an important cross section of successful Chinese bureaucrats By plotting and analyzing the different patterns their official careers took we should be able to determine what kind of men reached the top of China's provincial and national administration during the final centuries of China's imperial history the qualifications that were required the factors which prompted rapid promotion or sudden disgrace We should also be able to determine the extent to which these and other factors varied markedly among Manchu Mongol Chinese Bannerman and Han incumbents and whether changes throughout the dynasty can be detected in policies concerning the office or in the career patterns of its personnel If such detection is possible this study may lend support to the view that late imperial China was not static but a society undergoing significant changes xi
