Politics and Heidegger's Concept of Thinking in Contemporary Art Louise Carrie Wales, 2021-09-16 Responding to Heidegger's stark warnings concerning the essence of technology this book demonstrates art's capacity to emancipate the life world from globalized technological enframing Louise Carrie Wales presents the work of five contemporary artists Martha Rosler Christian Boltanski Krzysztof Wodiczko and collaborators Noorafshan Mirza and Brad Butler who challenge our thinking and compel a dramatic repositioning of social norms and hidden beliefs The through line is rooted in Heidegger's question posed at the conclusion of his technology essay as understood through artworks that provides a counter to enframing while using increasingly sophisticated technological methods The themes are political in nature and continue to have profound resonance in today's geopolitical climate The book will be of interest to scholars working in art history aesthetics philosophy and visual culture

Architecture Grant Alford, 2025-05-28 This book offers a comprehensive exploration of craft theory in relation to contemporary architecture Craft is an old and familiar idea but the line between craft and art or craft and mere

manufacturing for example is notoriously hard to describe In architecture a similarly blurred line between the design process on one hand and the physical making of buildings on the other lies at the center of various debates about what it means to do architecture The growth and development of craft theory in recent years suggest new insights into these architectural debates but situating the meaning of craft within architecture within today's technological landscape is a complex problem Alford responds to this challenge by collecting various narratives from craft theory and other fields and discerning among them new lenses through which to view contemporary architectural practice Episodes from this expanded view of craft in architecture go beyond predictable accounts of Ruskin and Morris to envision new models of practice new ways of engaging other building professionals and new ways for architects to understand their own labor and the nature of how and what kinds of things they themselves craft Architecture is changing and within the ongoing story of craft explored in this book are new and surprising ways to understand design and construct the built environment Written for students and scholars this book challenges and extends the legacy of craft thinking in architecture

Hostility to Hospitality Michael J. Balboni, Tracy A. Balboni, 2018-09-18 Spiritual sickness troubles American medicine Through a death denying culture medicine has gained enormous power an influence it maintains by distancing itself from religion which too often reminds us of our mortality As a result of this separation of medicine and religion patients facing serious illness infrequently receive adequate spiritual care despite the large body of empirical data demonstrating its import to patient meaning making quality of life and medical utilization This secular sacred divide also unleashes depersonalizing social forces through the market technology and legal bureaucratic powers that reduce clinicians to tiny cogs in an unstoppable machine *Hostility to Hospitality* is one of the first books of its kind to explore these hostilities threatening medicine and offer a path forward for the partnership of modern medicine and spirituality Drawing from interdisciplinary scholarship including empirical studies interviews history and sociology theology and public policy the authors argue for structural pluralism as the key to changing hostility to hospitality

Coulter-Harris, 2016-08-12 Humans have been chasing immortality since the beginning of history seeking answers to sickness and aging death and the afterlife and questioning the human condition Analyzing ideas from ancient Sumer Egypt Greece and India as well as the Abrahamic religions of Judaism Christianity and Islam this study explores how early religious models influenced later beliefs about immortality the afterlife the human soul resurrection and reward and punishment The author highlights shared teachings among the most influential religions and philosophies

concluding that humankind has not substantially changed its conceptions of immortality in 6 000 years This continuity of belief may be due to chromosomal memory and cultural inheritance or may represent a fundamental way of conceptualizing the afterlife to cope with mortality
