**Classical and Modern Interactions** Karl Galinsky,2010-07-22

Postmodernism multiculturalism the alleged decline of the United States deconstruction leadership and values these topics have been at the forefront of contemporary intellectual and cultural debate and are likely to remain so for the near future Participants in the debate can usefully enlarge the perspective to a comparison between the Greco Roman world and contemporary society In this thought provoking work a noted classics scholar tests the ancient modern comparison showing what it can add to the contemporary debates and what its limitations are Writing for intellectually adventurous readers Galinsky explores Greece and Rome as multicultural societies debates the merits of classicism in postmodern architecture discusses the reign of Augustus in terms of modern leadership theories and investigates the modern obsession with finding parallels between the supposed decline and fall of Rome and the decay of U S society Within these discussions Galinsky shows the continuing vitality of the classical tradition in the contemporary world The Greek and Roman civilizations have provided us not only with models for conscious adaptation but also points for radical departures This ability to change and innovate from classical models is crucial Galinsky maintains It creates a reciprocal process whereby contemporary issues are projected into the past while aspects of the ancient world are redefined in terms of current approaches These essays result in a balanced assessment and stimulating restatement of some major issues in both contemporary U S society and the Greco Roman world The book which speaks to a wide interdisciplinary audience is based on a series of lectures that Galinsky gave as a national visiting scholar for Phi Beta Kappa It concludes with a discussion of the role of classical studies in the United States today

**Articulating British Classicism** Elizabeth McKellar,2017-07-05

Whereas the past decades have seen a profound reconsideration of eighteenth century visual culture the architecture of that century has undergone little evaluation Its study unlike that of the early modern period or the twentieth century has continued to use essentially the same methods and ideas over the last fifty years Articulating British Classicism reconsiders the traditional historiography of British eighteenth century architecture as it was shaped after World War II and brings together for the first time a variety of new perspectives on British classicism in the period Drawing on current thinking about the eighteenth century from a range of disciplines the book examines such topics as social and gender identities colonialization and commercialization notions of the rural urban and suburban as well as issues of theory and historiography Canonical constructions of Georgian architecture are explored including current evaluations of the continental intellectual background the relationship with mid seventeenth century Stuart court classicism and the development of the subject in the

**Resisting Postmodern Architecture** Stylianos Giamarellos, 2022-01-10

Since its first appearance in 1981 critical regionalism has enjoyed a celebrated worldwide reception. The 1990s increased its pertinence as an architectural theory that defends the cultural identity of a place resisting the homogenising onslaught of globalisation. Today its main principles such as acknowledging the climate, history, materials, culture and topography of a specific place are integrated in architects' education across the globe. But at the same time the richer cross-cultural history of critical regionalism has been reduced to schematic juxtapositions of the global with the local. Retrieving both the globalising branches and the overlooked cross-cultural roots of critical regionalism, *Resisting Postmodern Architecture* resituates critical regionalism within the wider framework of debates around postmodern architecture, the diverse contexts from which it emerged and the cultural media complex that conditioned its reception. In so doing it explores the intersection of three areas of growing historical and theoretical interest: postmodernism, critical regionalism and globalisation. Based on more than 50 interviews and previously unpublished archival material from six countries, the book transgresses existing barriers to integrate sources in other languages into anglophone architectural scholarship. In so doing it shows how the periphery was not just a passive recipient but also an active generator of architectural theory and practice. Stylianos Giamarellos challenges long-held central notions of supposedly international discourses of the recent past and outlines critical regionalism as an unfinished project apposite for the 21st century on the fronts of architectural theory, history and historiography. **An**

[Lateness and Modernism](#) Sarah Collins, 2019-08. Examines the role of musical figures within late modernism, presenting a new understanding of the politics and aesthetics of lateness. [London's 'Big Bang' Moment and its Architectural Conversations](#) Stephen Rosser, 2025-06-30. This book explores the topic of architecture as a component of public discourse focussing on the reception of four high-profile developments in the City of London, the UK capital's financial district, dating from the final years of the twentieth century. During this time the City's mode of operation, culture and built environment were all transformed as a result of the market deregulation process labelled 'Big Bang'. It was also a period which saw the subject of architecture attracting public and media attention, becoming a prominent feature of national conversation. The book examines the extensive and often contentious discourse generated by the four case study projects. It looks at how these projects were viewed and interpreted retrospectively when they had become part of the City's long and rich history. Topics explored include building and urban form on the eve of the millennium, the place of new development in a setting of unique historic importance, the iconic building and celebrity architect, and the role of then Prince Charles as an architectural critic. Also referenced are many of the broader issues of the day, including the Thatcher government policies and the preoccupations concerning London's infrastructure, public realm, inner-city areas and inequalities. Furthermore, ranging

across the discourse is the theme of the relationship between buildings and global finance foreshadowing later controversies concerning London's post millennial towers and their impact on the capital's skyline The book will be of interest to researchers and students of late twentieth century British architecture and urban development London's history and UK public discourse in the 1980s a decade of profound political economic and social change *Classical Japanese Cinema Revisited* Catherine Russell, 2011-06-16 Catherine Russell's highly accessible book approaches Japanese cinema as an industry closely modeled on Hollywood focusing on the classical period those years in which the studio system dominated all film production in Japan from roughly 1930 to 1960 Respectful and thoroughly informed about the aesthetics and critical values of the Japanese canon Russell is also critical of some of its ideological tendencies and her analyses provide new insights on class and gender dynamics Russell locates Japanese cinema within a global system of reception and she highlights the importance of the industrial production context of these films Including studies of landmark films by Ozu Kurosawa and other directors this book provides a perfect introduction to a crucial and often misunderstood area of Japanese cultural output With a critical approach that highlights the everydayness of Japanese studio era cinema Catherine Russell demystifies the canon of great Japanese cinema treating it with fewer auteurist and Orientalist assumptions than many other scholars and critics **Proceedings of the Danish Institute at Athens IX** Nicolai Mariegaard, Kristina Winther

Jacobsen, 2019-08-01 Modernism and Democracy Rachel Potter, 2006-07-20 Anglo American modernist writing and modern mass democratic states emerged at the same time during the period of 1900-1930 Yet writers such as T S Eliot W B Yeats Ezra Pound Wyndham Lewis and Ford Madox Ford were notoriously hostile to modern democracies They often defended in contrast anti democratic forms of cultural authority Since the late 1970s however our understanding of modernist culture has altered as previously marginalised writers in particular women such as Gertrude Stein Djuna Barnes H D and Mina Loy have been reassessed Not only has the picture of Anglo American modernist culture changed significantly but the understanding of the relationship between modernist writing and politics has also shifted Rachel Potter here reassesses the relationship between modernism and democracy by analysing the wide range of different reactions by modernist writers to the new democracies She charts the changes in the ideas of democracy as a result of the shift from liberal to mass democracies after the First World War and of women's entrance into the political and cultural spheres By uncovering hitherto unanalysed essays by a number of feminist writers she argues that in fact there was a widespread scepticism about the consequences of mass democracy for women's liberation and that this scepticism was central to the work of women modernist writers
