The challenge of drafting purchase price adjustment clauses

in merger & acquisition contracts Alexander W. Nürk, 2008-08-25 Inhaltsangabe Introduction The topic of Mergers and Acquisitions M A is currently on everyone's lips No day passes by without reading about a planned or realised M A transaction in the newspapers The last few years have been record years for the M A business The year 2007 could in fact top the record year of 2006 Although the first half of 2007 was remarkably successful the subprime crisis of the credit markets led to a slow down in the second half However M A transactions with a transaction volume of approximately 4 830 billion took place worldwide in 2007 The forecasts for 2008 expect a recession of the transaction volume of up to 25 % of the previous year Mega deals will not make the headlines as often as in 2007 because banks became more careful in granting credits for such deals due to the subprime crisis However M A International INC MAI expects that the subprime crises will have only little impact on small and medium sized M A transactions and 2008 will still be a good year for the M A business Various companies have also taken advantage of the weak U S Dollar exchange rate and plan M A deals overseas Since the wind has not yet been taken out of the M A businesses sails the challenge of performing a successful M A transaction remains Like any other businesses M A transactions are a dynamic process which has to be accounted for When a buyer purchases a company target the assets of the company cannot be held in stasis until the transaction is settled The company is in a constant flow and its value changes constantly This makes it hard to determine a precise purchase price that remains valid from the beginning until the end of the transaction process Since the value of the company changes through this process the purchase price has to be adjusted Therefore purchase price adjustment tools have to be part of the M A contract to ensure so Generally legal counsels are assigned to draft M A contracts for the parties Although an M A team should consist not only of lawyers but also of accountants tax consultants and others where every member is specialised in a certain field the legal counsel should have a general overview since he is the one drafting the contract The quality of his drafting becomes apparent when disputes arise Most lawyers have no clue about company valuation methods or the principles of orderly accounting However these two applications are essential when it comes to drafting

Financial Management in the Sport Industry
Matthew T. Brown, Daniel A. Rascher, Mark S. Nagel, Chad D. McEvoy, 2021-04-07 Now in a fully revised and updated third edition this essential textbook introduces the fundamentals of sport finance and sound financial management in the sport industry It is still the only textbook to explain every aspect of finance from the perspective of the sport management practitioner explaining key concepts and showing how to apply them in practice in the context of sport The text begins by covering finance basics and the tools and techniques of financial quantification using industry examples to apply the principles of financial management to sport It then goes further to show how financial management works specifically in the sport industry Discussions include interpreting financial statements debt and equity financing capital budgeting facility financing economic impact risk and return time value of money and more The final part of the book examines financial management in four sectors of the industry public sector sport collegiate athletics professional sport and international sport

It provides an in depth analysis of the mechanics of financial management within each of these sport sectors Useful features such as sidebars concept checks practice problems case analysis and case questions will help students engage more deeply with financial techniques and encourage problem solving skills This new edition includes a completely new chapter on international sport reflecting the globalized nature of the modern sport industry as well expanded coverage of current issues such as digital media finance recent legal cases affecting collegiate sport and the central importance of collective bargaining Financial Management in the Sport Industry is an essential textbook for any undergraduate or postgraduate course in sport finance and an invaluable supplement to any course in sport business or sport management It is also an important reference for all sport management practitioners looking to improve their understanding of finance The book is accompanied by updated and expanded ancillary materials including an instructor s manual PowerPoint slides and an image bank **An**

Asian Direct and Indirect Real Estate Investment Analysis Kim Hin David HO,2021-05-04 This book is dedicated to real estate scholastic work in advancing the greater understanding of real estate investment analysis This is because there has been limited research in bringing out clearly the uncertainty or risk which is quantifiable uncertainty in real estate market analysis Even real estate market research which is carried out as an industry practice among private real estate researches is no exception Another reason is that it has been widely accepted that while the financial revolution has substantially changed many sectors of the financial industry it has made little impact on real estate development and investment practice as well as scholastic work Furthermore while it is readily acknowledged that despite its huge share in the world health real estate investment discipline and research is on the whole still a poorly researched subject area As a result the industry tends to be dominated by traditional real estate analysts with little understanding of real estate market uncertainty and capital markets These commentators are widely regarded to spend too much time worrying about local space supply and demand conditions while totally losing sight of the everchanging real estate market and capital market conditions The theme of this book is real estate investment analysis of direct and indirect real which in turn can be appropriately managed under economic theory and the theoretical conceptions of real estate finance provided the uncertainty is quantifiable The book deploys case studies involving Singapore and Asia This Black over White background viii framework enables real estate market analysis to attempt what defines the Asian direct and indirect real estate sectors what is being measured how it behaves in terms of price and non price factors how it is structured and how it effectively achieves the objectives of sustainable total returns and manageable real estate market uncertainty Managing real estate market uncertainty optimally is achieved at the portfolio level through real estate asset allocation This is important because the real estate portfolio is able to virtually eliminate the unique i e specific uncertainties among the various Asian real estate sectors thus retaining within the portfolio only the systemic i e market wide uncertainty Apart from real estate asset allocation the alternative and modern approach to risk management at the portfolio level is the value at risk VaR approach Another modern and important alternative to coping with

uncertainty is real option analysis and pricing that help to better define real estate market uncertainty in extent and time Real option analysis and pricing also represent uncertainty via a decision tree and the risk neutral probability conception in order to comprehend how uncertainty impacts on the value of real estate investment decisions The pricing of uncertainty is based on the risk free hedge security conception These are best examined at the micro level of the investment in a real estate development opportunity on vacant land Nevertheless the real estate sectors in Singapore and Asia offer promising prospects since the Asian currency crisis of 1997 It is now timely to take stock and make an assessment of how the sectors would pan out for the future Ill into at least rest the next century I are very pleased to present our thinking and research in international real estate with particular emphasis on Asia The region s vast potential for real estate is itself a large incentive for international real estate research and education that has inspired me to document the significant work I have done over the years Black over White background ix I wish all readers a pleasurable reading of this book and I thank you sincerely for your support without which the publication of this book would be made all the more difficult Dr HO Kim Hin David Honorary Professor University of Hertfordshire UK International Real Estate Public Policy March 2021
