Modern Criminal Law:

Making the Modern Criminal Law Lindsay Farmer, 2016-01-21 The Criminalization series arose from an interdisciplinary investigation into criminalization focussing on the principles that might guide decisions about what kinds of conduct should be criminalized and the forms that criminalization should take Developing a normative theory of criminalization the series tackles the key questions at the heart of the issue what principles and goals should guide legislators in deciding what to criminalize How should criminal wrongs be classified and differentiated How should law enforcement officials apply the law s specifications of offences This the fifth book in the series offers a historical and conceptual account of the development of the modern criminal law in England and as it has spread to common law jurisdictions around the world The book offers a historical perspective on the development of theories of criminalization It shows how the emergence of theories of criminalization is inextricably linked to modern understandings of the criminal law as a conceptually distinct body of rules and how this in turn has been shaped by the changing functions of criminal law as an instrument of government in the modern state The book is structured in two main parts The first traces the development of the modern law as a distinct and conceptually distinct body of rules looking in particular at ideas of jurisdiction codification and responsibility The second part then engages in detailed analysis of specific areas of criminal law focusing on patterns of criminalization in relation to property the person and sexual conduct

Foundational Texts in Modern Criminal Law Markus D Dubber, 2014-08-21 Foundational Texts in Modern Criminal Law presents essays in which scholars from various countries and legal systems engage critically with formative texts in criminal legal thought since Hobbes It examines the emergence of a transnational canon of criminal law by documenting its intellectual and disciplinary history and provides a snapshot of contemporary work on criminal law within that historical and comparative context Criminal law discourse has become and will continue to become more international and comparative and in this sense global the long standing parochialism of criminal law scholarship and doctrine is giving way to a broad exploration of the foundations of modern criminal law The present book advances this promising scholarly and doctrinal project by making available key texts including several not previously available in English translation from the common law and civil law traditions accompanied by contributions from leading representatives of both systems

Modern

Criminal Law A P Simester, 2024-04-18 This book brings together leading scholars from the next generation of UK criminal lawyers to celebrate the work of GR Sullivan Emeritus Professor at University College London in the year of his retirement from writing Simester and Sullivan's Criminal Law Theory and Doctrine The contributors examine many of the areas in which GR Bob Sullivan's own writing has been influential ranging from general doctrines such as causation and culpability across specific offences like theft and fraud through defences including necessity and insanity before turning finally to matters affecting the criminal process notably challenges to the doctrine of precedent in criminal law Taken together the essays are a powerful tribute to Bob's standing and influence upon modern criminal law At the same time individually they make sophisticated contributions to our understanding of some pressing issues in contemporary criminal law The essays illustrate the increasing importance of theoretical argument in modern criminal law as well as the manner in which doctrinal debates have become interwoven with arguments about criminalisation norms The resulting collection is thus a tribute also to the character of modern academic criminal law a character that Bob and the writers of his generation did so much to develop

Common Knowledge of Modern Criminal Law in the People's Republic of China Shizhou Wang, 2025 In the course of China's reform and opening up since the late 1970s the country has made remarkable economic and social progress China's jurisprudence particularly in criminal law has also seen significant transformation Accordingly the international legal community has shown considerable interest in the evolution of China's criminal law I have authored numerous articles in English and German detailing the latest developments in Chinese criminal law some of which have been translated into various languages including Russian Japanese Korean Spanish Turkish Ukrainian and Georgian Additionally I contributed to the Criminal Law in China section in the International Encyclopedia of Laws a project compiled by Kluwer Law International in Europe This section provides a systematic introduction to China's criminal justice system but due to the constraints of the encyclopedia's scope and editorial guidelines it predominantly focuses on delineating the stipulations and the current state of Chinese criminal law However in the field of modern criminal law the most fundamental aspect is the study of legal theory especially the modes of thinking that it encompasses Therefore my aspiration has been to systematically summarize and clarify the contemporary state of Chinese criminal law theory as well as to clearly describe the thought processes characteristic of China's modern criminal jurisprudence This book in its Chinese edition aims to inspire and motivate the Chinese people to recognize their roles in the modern rule of law and to actively participate in the construction of China's socialist rule of law It does so by explaining the comprehensive theory of modern criminal law in an accessible manner The English version leverages this work to facilitate a deeper understanding of the latest developments in modern Chinese criminal law theory for English speaking readers In my view such an endeavor holds significant value for fostering cultural exchanges in the context of our global pursuit to build a community with a shared future for all humanity Author

The Right to Be Punished Gabriel Hallevy, 2012-10-12 Does an offender have the right to be punished The right to be punished may sound like an oxymoron but it is not necessarily so With the emergence of modern criminal law the offender gained the right to be punished by rational criminal law rather than being lynched by an angry mob The present day offender may have the right to be punished by doctrinal sentencing rather than being subjected to verdicts based on vague unclear and uncertain principles In modern criminal law the imposition of criminal liability follows accurate and strict rules whereas there are no similar rules for the imposition of punishment The process of sentencing is vague and obscure as are the considerations used for the imposition of punishments The objective of the present book is to propose a comprehensive general and legally sophisticated theory of modern doctrinal sentencing The challenges of such a legal theory are plenty and complex In addition to increasing clarity and certainty modern doctrinal sentencing must deal with modern types of delinquency e g organized crime recidivism corporate offenders high tech offenses etc and modern principles of criminal law Modern doctrinal sentencing must serve to ensure optimal sentencing
