Park, M.D.,2016-11-11 In The Impact of Illness on World Leaders Bert E Park explores the relationship between leadership and neurologic illness Basing his study on a rigorous

examination of primary and secondary source material from medicine history and political science Park diagnoses illnesses which affected the thinking and actions of Anthony Eden and Adolf Hitler among others He discusses the historical situations in which these political leaders functioned and the effects their illnesses might have had on the decisions they made Park argues that the impact of aging and disease on leadership abilities is an important potentially devastating problem which has been ignored by the people in a position to deal with it Physicians who attend men in power supported by government officials and politicians often disguise their patients infirmities and keep them in office long after they are able to function effectively In those few instances when the problem has been addressed it has often been done by journalists or other persons not qualified to make a medical judgment about a leader s health and they have relayed erroneous information e g the myth of Hitler s syphilis Part of the goal of *The Impact of Illness on World Leaders* is to correct such popular misconceptions Park concludes his study of leadership and illness with suggestions for monitoring the health of leaders and deposing them if their health compromises their ability to lead *The Ohio State Medical Journal* ,1908 *The Journal of Metabolic Research* Frederick Madison Allen,1923 Vol 2 no 5 6 contains the first detailed reports of the clinical use of insulin cf Pref p 545 *The Illinois Medical Journal* ,1914 *Southern Medical Journal* ,1915 *Psychogenic Movement Disorders* Mark Hallett,C.
